AUDITOR'S REPORT

Quincy, Mass., March 1, 1922.

To the City Councillors, Quincy, Mass.

In accordance with the ordinance of the city, I submit the annual report of my department, showing in detail the receipts and expenditures of each department.

Also several statements showing the financial condition of the city at the close of the financial year, December 31, 1921.

HENRY O. FAIRBANKS, *City Auditor.*

IN COUNCIL

Ordered:

Feb. 28, 1921.

That the several sums named herein be and are hereby appropriated for the payment of the expenses of the City of Quincy for the financial year beginning January 1, 1921, and ending December 31, 1921, to be expended by and under the direction of the several officers or boards as herein designated.

That the appropriation for Water Maintenance and Clerical be paid from the Water Receipts.

MUNICIPAL FINANCES ILLUSTRATED

The following diagram shows how the revenue of 1921, derived from taxes and ordinary receipts, excluding all money borrowed, was expended:

"Highways" includes maintenance, repairs, rebuilding of street, street watering and street lighting. "Protection of Persons and Property" includes police, fire, gypsy moth, sealer of weights, building and wire inspection. "General government" includes the offices in City Hall.

HENRY O. FAIRBANKS,
Auditor of Accounts.

Waivers of four day law issued	436
Waivers of four day law refused	132

Sickness and Disability

The number of days lost by members were as follows:

Total number of days.....	416
4 men lost 1 day each	
5 men lost 2 days each	
5 men lost 3 days each	
8 men lost 4 days each	
2 men lost 5 days each	
4 men lost 6 days each	
4 men lost 7 days each	
2 men lost 9 days each	

1 man lost 10 days
 3 men lost 11 days each
 2 men lost 12 days each
 3 men lost 16 days each
 2 men lost 19 days each
 1 man lost 23 days
 1 man lost 26 days
 1 man lost 34 days
 1 man lost 39 days

Traffic

One of the greatest problems that confronts a city of our size and situated as we are, is the effective regulation of traffic and since that responsibility has been mine I have given it careful study and attention.

Figures and facts show that our efforts were not in vain and the number of accidents show our traffic and cycle officers have done their part most efficiently, but it is regrettable that such a large number of accidents are caused by the carelessness and indifference of the victims.

The traffic problem will, in a short time, be a serious matter and must remain in the hands of the police to regulate. I believe the time has arrived that their suggestions should be given consideration in the question of highway planning for the future.

The recent establishment of the Traffic Ordinance was a long step toward safety and efficiency, and while some parts were in the nature of an experiment, we will necessarily soon ask for amendments as well as a few additional regulations.

Liquor Law

Early in the year it was found necessary to detail a man especially to the enforcement of the liquor law. Inspector Larkin was chosen because of his experience in former years. The results accomplished by him have been very gratifying. This branch of police work more than ever before requires determination and ceaseless vigilance.

Under existing laws it is more difficult than ever before to successfully minimize the number of "Bootleggers" and "Moonshine Manufacturers." The few following figures speak well for this branch of the department:

Arrests for Liquor Law Violations for 1920.....	25
Arrests for Liquor Law Violations for 1921.....	85

Detective Bureau

I cannot express too well my appreciation of the work done by this branch of the department in charge of Sergeants Daniel H. Doran and John J. Avery.

My own years of experience in this branch have shown me the determination and long hours required to accomplish such results as these men have shown during the past year.

They have worked honestly and faithfully, paying the same attention to the small case as to the large or seemingly more important ones given them for investigation.

Discipline

It is well known that nothing will so demoralize the efficiency of a department so quickly and completely as the absence of rigid but fair discipline.

When I assumed charge of this department, I immediately sought to acquaint the officers with knowledge of my determination to first demand strict discipline, but that I was equally determined to administer "The Square Deal" in dealing with them.

I also showed them that the faithful and efficient discharge of their various duties required uprightness and truthfulness, and that like all other members of the force they may hope to rise to higher positions through their activity and good conduct. Also that advanced positions are filled by men who began at the bottom and so far as it is possible for me to enforce, promotions will be influenced by no consideration except the merit of the man.

They were also shown that the detailing of street sergeants was not alone for the purpose of detecting the violation of department rules, but to aid and advise them as they deserved in reaching the standard of efficiency which citizens expect.

I am sure the officers profited by the advice and that they now know that the merit of the man is always my first consideration, and I am also sure the good fellowship, keen, but friendly rivalry among the men can only produce good results.

Equipment

The department is better equipped than at any time and never before were all members equipped and armed as required by rules and ordinances.

Every member is today equipped with the highest type of weapon and other equipment required by the rules.

We are also provided with a machine gun furnished us free of charge when the Quincy Home Guard disbanded; also about forty repeating riot guns which came into our possession after the World War and an adequate supply of ammunition.

Some of these guns are now placed secure, in proper containers, in different sections of the city, and are easily accessible to the officers should an emergency require their use.

Proper emergency tools for drowning accidents have been long wanted and today I believe we are safely equipped including a proper and safe boat now almost ready.

Most of our equipment and improvement has been produced by the good and co-operative spirit among the men, among whom are many good mechanics.

The department patrol wagon could not be improved. Our three motorcycles were purchased new last year but are in excellent condition. The Chief's automobile, though two years old, has been driven about 18,000 miles and is now in excellent condition. The only serious drawback today is our old Knox patrol auto of 1909 vintage, which has outlived its usefulness.

Three powerful searchlights of late pattern, for use on raids, search for lost children, and even in the deep water of the many quarry holes in which we are often compelled to grapple for drowned persons have been provided.

We have recently added a section to our badly crowded garage which gives us considerable relief in that department.

During the present year we have added to our list of signal stations a signal box on Penn's Hill at High Street, another on Sea near Palmer, while another is now being installed at Squantum.

412—	Cor. Adams and Whitwell Streets.
413—	Cor. Sea and Palmer Streets.
414—	Houghs Neck.

Recommendations

Considerable publicity has been given the question of a more suitable location and building for this department; also the addition to the force of a matron and woman investigator. If the claims advanced appear justified, I sincerely hope early action will be taken.

I earnestly recommend that consideration be given my claims for a new medium priced vehicle for relief work of many kinds

concerning which I would be glad to explain. This automobile would take the place of the old Knox car built for this department in 1909.

Conclusion

I desire to express thanks and appreciation for kindly advice and assistance given me during the year by His Honor Mayor Bradford, the members of the City Council, the Honorable Judge Albert E. Avery, the associate judges, and all attaches of our court.

And to our City Auditor and City Clerk, also their assistants on whose kindness I have to indulge in operating the affairs of this department, I am thankful for many favors.

To the public, I am appreciative for many acts and expressions of confidence in the work done by this department and I sincerely hope our efforts to serve the public will merit continued approval.

Respectfully submitted,

ALFRED W. GOODHUE, *Chief of Police.*

ANNUAL REPORT OF THE CEMETERY DEPARTMENT

Quincy, January 1, 1922.

Hon. William A. Bradford,
Mayor of Quincy.

Dear Sir,—The Manager of Public Burial Places respectfully presents the following report for the year ending December 31, 1921:

Appropriations

	<hr/>
	\$406.00
Expended on care of lot	6.00
	<hr/>
Balance on hand	\$400.00

In the record of deaths the past year I regret to note the names of two faithful and efficient officers of the Cemetery Department.

Mr. Thomas Johnston, for many years a Foreman in this Department and the last three years as Superintendent of Cemeteries, died March 9, 1921.

Mr. James Nicol, for twenty-five years Superintendent of Mt. Wollaston Cemetery, the last three years of his life serving in an advisory position as Asst. Superintendent, died November 9, 1921.

The position of Superintendent of Cemeteries is a difficult one, and I believe the city is to be congratulated on securing for that position Mr. Thomas L. Gammon, who was appointed March 1, 1921.

W. W. MITCHELL, *Manager.*

REPORT OF CITY PHYSICIAN

January 1, 1922.

Hon. William A. Bradford, Mayor,
City of Quincy, Mass.

Dear Sir,—As City Physician, I respectfully submit the following report of my services for the year ending December 31, 1921:

Visits to the Outside Poor	169
Visits to the Office	39
Visits to the Almshouse	12
Visits to the Police Station	21
Vaccinations	12
Attendance in Childbirth	3
Visits for the Health and School Departments	5
Attendance in Court	3

Yours respectfully,

THOMAS J. DION, M.D.,
City Physician.

REPORT OF OVERSEER OF POOR

January 1, 1922.

To His Honor the Mayor of the City of Quincy:

The Overseer of the Poor, in compliance with the City Ordinances, respectfully submits his report for the year ending December 31, 1921.

The department has aided 243 families on outside poor, 129 of these being temporary; including as causes for application, sickness, desertion and unemployment in cases where the wage earner was incapacitated. Of these cases, 37 children are fully supported, and we feel that the money expended for this kind of aid is amply justified.

We have aided 49 families under Mothers' Aid, which means almost entire support; of these two have been discharged during the year, having become self supporting.

We have had 109 cases referred by the Police Department, probation office and various other sources. These we have investigated and found that in several instances the cases should be prosecuted, which was done. In some cases we have given advice, visited, and court action was avoided. Some of these cases have been referred to societies for more frequent visiting than we could give.

The Juvenile Court has been attended at every session and much help has been gained from this source in a better knowledge of our family conditions.

This year has been an unusual one on account of the unemployment situation.

We have handled 393 unemployment problems which entails many family difficulties. At the beginning of the year we were able to place many of the men, but in August the situation became more acute and we were obliged to make a definite plan for aid or work. We believed that it was better for the family morale to find work for the men of the family. We had some land at the City Home which needed grading and we planned to use our unemployed men to do this work. This plan has worked out very well and we feel that we have done much to help the men keep their self-respect and continue to support their families. We also by this plan weeded out the undesirable element who wanted aid and not work at a small wage.

Our Social Service work is increasing steadily and the many different problems, which come to us for solution, affecting the welfare of the community, tend to show that we are in truth a welfare department.

We appreciate the co-operation of the Associated Charities and various societies which have helped us by visiting and advising, thus keeping up the morale of many of our families.

A detailed report of the cost of the department will be found in the following statement:

The following is the financial statement for the year 1921:
Appropriations:

Office supplies	\$200.00

False, 27.

The Central Station apparatus responded to 298 alarms.

The Wollaston Station apparatus responded to 143 alarms.

The Atlantic Station apparatus responded to 106 alarms.

The Quincy Point Station apparatus responded to 87 alarms.

The West Quincy Station apparatus responded to 84 alarms.

The Houghs Neck Station apparatus responded to 43 alarms.

Total number of feet of hose laid, 53,600.

Total number of feet of ladders raised, 3,776.

Total number of gallons of chemicals used, 4,362.

Hydrants in use, 126 hours, 40 minutes.

Time absent from quarters, 516 hours, 55 minutes.

Valuations, Insurance and Losses

Value of property involved	\$1,995,786.49
Insurance on same	1,225,498.00
Loss insured and uninsured	341,570.50

Fire Losses for Year of 1921

<i>Month</i>	<i>Buildings</i>	<i>Contents</i>	<i>Losses</i>
January	\$7,611.00	\$4,717.25	\$12,328.25
February	3,120.00	1,127.40	4,247.40
March	4,850.00	2,722.00	7,572.00
April	9,650.00	10,290.85	19,940.85
May	4,419.41	843.10	5,262.51
June	699.00	70.00	769.00
July	1,570.00	700.00	2,270.00
August	219.00	219.00
September	4,443.69	2,307.00	6,750.69
October	4,533.00	4,350.17	8,883.17
November	33,726.00	67,883.38	101,609.38
December	89,735.00	81,983.25	171,718.25
Grand Totals	\$164,576.10	\$176,994.40	\$341,570.50

Inspections

Over 6,000 inspections have been made the past year.

Fire Alarm

A new battery will have to be installed in the Fire Alarm. There have been three new boxes added the past year. Approximately five miles of new wire have been run.

While the losses by fire and smoke have been large the past year, perhaps larger than ever before, in my opinion had it not been for the efficient work of the men of the Fire Department the total losses would have been much larger. Large fires are liable to occur in any locality. Quincy has been fortunate in not having any big fires for a long while.

The Quincy Department Store fire, while not showing from the outside that it was a very large fire, yet the loss was very heavy, mostly on the contents.

The fire at the Mutual Furniture Corporation and other buildings was fought under very trying circumstances, zero weather, men and equipment all iced up, four lines of hose being burned off which caused delay, but with the combined efforts of our own department and a company from Milton and Boston departments, the fire was stopped before it reached the conflagration stage. Insurance men were very much pleased by the good work of the department.

Respectfully submitted,

ALFRED L. MEAD, *Chief of Fire Department.*

REPORT OF CITY CLERK

I have the honor to submit the thirty-third annual report for this department, being for the year ending December 31, 1921.

RECEIPTS

Junk Licenses	\$290.00
Amusement Licenses	1,575.00

JAMES M. CANTFILL, *Sealer of Weights and Measures.*

ASSESSORS' REPORT

January 1, 1922.

To His Honor, the Mayor and the City Council:

Gentlemen: The following is respectfully submitted as the report of the Assessing Department for the year 1921:

Valuation

The valuation of the city April 1, 1921, as determined by the Assessors, follows:

Value of land	\$18,370,375.00	
Value of buildings.....	32,033,150.00	
U. S. Housing Corporation.....	1,468,750.00	
	<hr/>	
Total		\$51,872,275.00
Valuation of personal property other than bank stock separately assessed	\$7,990,200.00	
Valuation of National Banks located in and taxable in the City of Quincy.	88,519.00	
	<hr/>	8,078,719.00
		<hr/>
Total valuation of the city as determined April 1, 1921.....		\$59,950,994.00
Amount to be raised by taxation.....	\$1,747,679.66	
Tax rate	36.40	
The valuation was also increased by omitted assessments levied in December, 1921		58,749.00
		<hr/>
The total valuation of the city upon which all taxes were assessed for the year 1921 when all assessments had been made.....		\$60,009,743.00

Valuation by Wards

(Not including valuation bank stock)

	<i>Personal</i>	<i>Real Estate</i>	<i>Total</i>
Ward 1	\$3,067,275.00	\$14,115,700.00	\$17,182,975.00
Ward 2	1,962,225.00	9,837,200.00	11,799,425.00
Ward 3	581,775.00	4,895,025.00	5,476,800.00
Ward 4	276,100.00	3,117,550.00	3,393,650.00
Ward 5	1,221,625.00	11,977,600.00	13,199,225.00
Ward 6	881,200.00	7,929,200.00	8,810,400.00
	<hr/>	<hr/>	<hr/>
	\$7,990,200.00	\$51,872,275.00	\$59,862,475.00

The polls returned by the assistant assessors and those registered for the year amounted to 14,765.

The assistant assessors who served during the year were: Ward 1, Walter H. Buchan and James A. D. McKay; Ward 2, Joseph E. Thomas and William J. Sullivan; Ward 3, Henry Tilden and Daniel McLennon; Ward 4, William R. Teasdale; Ward 5, Mrs. Harriet Bates and George G. Saville; Ward 6, George H. Bean.

Summary from the Table of Aggregates

Resident property owners	9,220
Non-resident owners	2,559
Poll tax only	13,377
Number horses assessed	740
Number neat cattle and cows	675
Number dwelling houses	9,428
Number acres of land	9,310

There has also been added the names of 13,923 women voters, which necessitated the making out for each woman a card giving her name, age, occupation, and residence, and entering same into a separate book of female polls assessed.

Respectfully submitted,

FREDERICK E. TUPPER,
CHARLES A. MACFARLAND,
MICHAEL T. SULLIVAN,

Assessors of the City of Quincy.

REPORT OF DEPARTMENT OF HEALTH

February 1, 1922.

To His Honor, the Mayor:

The policies of this department during the past year have been as follows:

To give a square deal to everyone.

To be a help and not a hindrance to all persons who are affected by health regulations.

To enforce these regulations by moral suasion and not by recourse to the courts.

To show in facts and figures, choice of material, estimate of costs and additional income the economic gain in sanitary improvements.

To remove from the city pigs and privy vaults.

To send to hospitals the most contagious and infectious cases that are a menace to well persons.

To establish a venereal disease clinic.

To establish and operate a bacteriological laboratory particularly for the examination of bacteria in milk.

To improve the quality of our ice supplies and to prevent dangerous ice from contact with food and drink.

To give even better collection and disposal of the excreta and waste of the city.

To co-operate for our mutual advantage with the health departments of the cities and towns in the vicinity of Quincy and with the State Department of Health.

To bring the health activities of the city as much under one head as is proper and as would work for the best interests of the city.

To change some of our health regulations that they may conform with modern, safe, minimum requirements.

To give timely medical advice in threatened epidemics.

To apprise our citizens and our children by addresses, newspaper items, literature and personal talks of the healthfulness of our city, of its present health hazards, and by professional advice of better methods for even greater healthfulness.

To improve the personnel and the activities of each member of this department.

To co-operate with the other departments of the city.

These policies have been faithfully carried out. A few failures must be recorded. Much remains to be done. The results, however, have been gratifying.

The appropriations for this department have been expended in a reasonably economical manner.

Our laborers, a most efficient group of men, voluntarily accepted a reduction in wages from \$5.00 to \$4.50 per day.

Doing our own automobile repairs promises a substantial reduction in cost.

The pensioning of the city's Sanitary Inspector, which his age and long honorable service in this department called for, and the appointment of a level-headed, energetic young man in this position has trebled the work done and minimized the supervision required.

Valuable assistance has been rendered by your Harbor Master in one of our most trying health problems, the nuisance of odor in the air and oil on the water from the Mass. Oil Refining Company at East Braintree.

The departure of this department from the damp dungeons of City Hall greatly increased its efficiency.

Hearty co-operation and assistance have always been accorded your Commissioner of Health by the City Council, yourself and your official family.

The kindly co-operation of physicians, nurses, churches, health organizations, other organizations and groups of citizens have impressed me with the community spirit in our city.

The loyalty and productiveness of the personnel of this department are generally excellent.

For these things I am deeply grateful.

The detailed activities of the department are shown in the reports appended.

FRED. E. JONES, M.D.,
Commissioner of Health.

REPORT OF SUPERINTENDENT

I hereby submit the annual report of the Department of Health for the year ending Dec. 31, 1921.

The personnel of the department is as follows:

Commissioner of Health and Inspector of Milk.

Superintendent.

Clerk.

Sanitary Inspector.

Assistant Milk Inspector.

Foreman of the Ash and Garbage Collection.

Plumbing Inspector.

Inspector of Meats and Provisions.

Dispensary Physician.

Child Welfare Physician.

Venereal Disease Physician.

Bacteriologist.

Tuberculosis Nurse.

Contagious Nurse.

Child Welfare Nurse.

Inspector of Animals and Slaughtering.

Under date of June 1, 1921, the City Council, upon your recommendation, retired Edward J. Lennon, Sanitary Inspector, on a pension, and the position was very ably filled by Alexander A. Robertson. Under date of Aug. 18, 1921, the department took four offices in the Central Building, as the office in City Hall was entirely inadequate for the amount of business we were required to handle.

The Sanitary Inspector, Mr. Robertson, has had a great amount of work to perform and he has performed his duties in an able and conscientious manner.

The foreman of the ash and garbage collection, Mr. Brogan, has also had a great deal of work to perform the past year. It must be taken into consideration that each new house being built adds work to this department, and as there were approximately 300 new houses built last year, some idea of the extra work of this department can be obtained. I also wish to add that the complaints as regards the collection of ashes, rubbish and garbage have been reduced to a minimum, which is very gratifying to the office.

The assistant inspector of milk, Mr. O'Dowd, has improved this part of the department to a very appreciable extent and with the addition of a laboratory, where we can get a bacteria count, I look to see the milk situation well taken care of.

The Inspector of Meats and Provisions, Mr. Rogers, has given freely of his time for the amount of salary received and the condition of the markets in this city will compare favorably with the markets of any other city in the state of like size.

Appended you will find the reports of the various inspectors and also my report of diseases and deaths reported for the year 1921.

In conclusion, I wish to thank you and all the members of the department for the co-operation and courteous treatment in all matters pertaining to this department.

Respectfully submitted,

THOMAS G. SMITH,
Superintendent of Health Department.

REPORT OF FOREMAN

I hereby submit my annual report for the year ending Dec. 31, 1921:

Ashes and rubbish collected by months:

January	2,678 cubic yards
February	2,151 cubic yards
March	2,364 cubic yards
April	2,416 cubic yards
May	1,823 cubic yards
June	940 cubic yards
July	953 cubic yards
August	712 cubic yards
September	640 cubic yards
October	1,680 cubic yards
November	2,496 cubic yards
December	2,742 cubic yards

	21,595 cubic yards @ \$1.36 per cu. yd..	\$29,369.20
Amount of garbage collected, 8,217 cu. yds. @ \$3.56 per cu. yd.		29,252.52
Cesspool matter collected, 797 cu. yds. @ \$2.83 per cu. yd.		2,263.48
Vault matter collected, 313 cu. yds. @ \$4.60 per cu. yd.		1,439.80
Total		\$62,325.00

The equipment of my department is in good condition. I would recommend the purchase of a Ford truck at a cost of not exceeding \$725, for the collection of garbage at Houghs Neck, Squantum, and Germantown. I would also recommend two collections a month of ashes and rubbish during the summer months.

Respectfully submitted,

JAMES BROGAN,
Foreman of Health Department.

REPORT OF THE SANITARY INSPECTOR

To the Commissioner of Public Health:

I herewith submit my report as Sanitary Inspector for the Department of Health for the seven months ending December 31, 1921. With the exception of the report of inspections, all figures quoted are for the year 1921, those for inspections being for the seven months beginning June 1, 1921, the date I took over the duties as Sanitary Inspector for this department.

Survey of Privy Vaults

During the past few months a survey has been made to ascertain the number and location of privy vaults in the city. The elimination of these privy vaults, is, I believe, the big problem for this department and every possible effort should be made during the coming year to eliminate as many of these nuisances as possible. Persons owning property on streets where there are public sewers should be compelled to have their houses connected. In cases where the public sewer is not accessible, I would recommend that steps be taken to educate the owners to the ever present danger, from a health standpoint, of privy vaults. They should be requested to install inside plumbing as soon as possible. I would suggest that you recommend to His Honor the Mayor, that the public sewer service be installed, as speedily as the financial condition of the city will permit, on streets where the large percentage of houses have privy vaults. Particular attention should be paid to the West Quincy section of the city as over fifty percent. of the vaults in Quincy are in that section. The figures quoted below give some idea of the prevalence of vaults. The figures for Houghs Neck (included in Ward 1) are estimated as it has been found impossible to make an accurate survey there this winter, most of the cottages being closed for the season.

	No. Vaults 1-1-21	No. Eliminated during year	No. Vaults 12-31 21
Ward 1	232	34	198
Ward 2	74	13	61
Ward 3	113	15	98
Ward 4	440	30	410
Ward 5	9	1	8
Ward 6	28	3	25
Totals	896	96	800

Sewer Connections

During the summer and fall months we co-operated with the Sewer Department in sending out notices to owners to connect with the public sewer. As soon as the Sewer Department started work on a street we would send notices to the abutters notifying them to connect and in most cases secured excellent results. In about sixty cases extension of time had to be granted until spring as the premises were at Houghs Neck and were closed for the season.

Premises connected after notice.....	56
Deposit paid but work not completed.....	45
Number cases extension of time granted.....	101
Number cases time not up.....	26
Total number of notices sent.....	228

Mosquito Abatement

The abatement of the mosquito nuisance occupied considerable of my time during the summer months. The work done, to a great extent, was experimental and I feel certain that with an adequate appropriation available during 1922, we can eliminate the pest to a great extent. Permanent eradication will come, however, only when marshes, swamps and other low areas are properly drained and when people discontinue to allow so-called accidental receptacles to remain on their premises.

The oiling of the breeding places was done five times during the past season, about 700 gallons being used for each spraying. This is not frequent enough to be most effective as the mosquito breeds in from ten to twenty days. To get the best results the oiling should be done every fourteen days and every ten days during the rainy season. The work should commence about the 15th of April and continue until about the 15th of September.

I would recommend that you include in your budget for the coming year the sum of \$2,500 for the abatement of the mosquito nuisance. I base my recommendation on the following figures:

Oil, 10,000 gallons, at 5 cents per gallon.....	\$500.00
Labor, 2 men, 25 weeks, and 2 men, 15 weeks at \$21.60 per week	1,728.00
Equipment, sprayers, mops, brooms, pails, barrels, taps, rubber boots	200.00
Miscellaneous	72.00
Total	\$2,500.00

Bakery Inspections

During the month of September, together with Dr. Drury of the Food and Drugs Division of the State Department of Public Health, I inspected every bakery in the city. In most cases conditions were found to be very good and the proprietors were complying with the laws and regulations. We found a violation that was common, it being that products were not properly protected in the salesroom. Instructions were given and in every case, excepting one, the violation has been remedied. In the only case not remedied, the illness of the proprietor necessitated the postponement of the hearing and consequently the violation was not remedied. It will be, however, before January 15, 1922.

Three of the shops were found to be in most unsanitary conditions. I refer to the following places: 21 Nash avenue, Abram Swartz, Prop.; 333 Water street, Benny Wise, Prop., and 61 Water street, Joseph Nardone, Prop. Mr. Swartz has cleaned his shop but he is the type of man who must be watched almost continually

as he is careless and indifferent. The shop belonging to Mr. Wise has been newly plastered and Mr. Grossman, the owner of the building, has agreed to paint the walls and ceilings. This will be a great improvement and Mr. Wise will have no excuse for not having a clean and sanitary baker shop. The plant owned by Mr. Nardone is in the basement of the house at 61 Water street, and like most basement bakeries is difficult to keep clean. This plant will not be occupied after March 1, 1922, as Mr. Nardone is having a new up-to-date plant built for him on Water street.

Stable Permits

Permits were granted for the remodelling of two buildings as stables. We insisted, however, upon the regulations being strictly adhered to, before we gave the parties permits to occupy the stables. We particularly insisted upon proper manure pits being constructed, as I found that the disposal of the manure is the worst feature of the stables in the city.

Ice Ponds

Sanitary surveys were made of the watersheds of the several ice ponds in the city and analyses were made of the waters of Furnace Brook, Little Brook, Eaton's Pond, Patch's Pond at South Quincy, Patch's Pond at Quincy Neck, Crystal Lake, Wendell's Quarry and Quincy Reservoir. Samples of ice were secured from the ice houses at Eaton's and Patch's South Quincy Ponds and these samples were sent to the State Department of Public Health to be analyzed. The reports of these surveys have already been submitted to you.

Complaints

During the seven months 146 complaints have been received from residents and investigations made. The nature of these complaints covers many phases of the work of a health or sanitary inspector. Following is a list of the types of complaints received:

- Cesspools overflowing.

- Unsanitary vaults.

- Piggeries.

- Obnoxious odors.

- Dumps.

- Water in cellar.

- Unsanitary hen yards.

- Rooster nuisances.

- Garbage being disposed of improperly.

- Garbage pails leaking or not properly covered.

- Contaminated well being used as drinking water.

- Unsanitary or unfit dwellings.

- Unsanitary toilets (inside plumbing).

- Drain from ice box causing nuisance.

- Stable nuisances.

- Manure nuisances.

- Breeding place for flies.

- Breeding places for mosquitoes.

Horse disturbing neighborhood.
 Unsanitary bakeries.
 Pollution of brooks.
 Refusing to allow set tubs to be used by tenant whose children were quarantined with the measles.
 Dead dogs.
 Dead hens.

Court Cases

It was necessary to resort to the courts in only two cases and in both of these cases convictions were secured. One case was for failing to construct a proper cesspool and the other was for emptying the contents of a cesspool on the street.

New Regulations

New regulations governing barber shops and restaurants were adopted during the past year and it is my intention to make a systematic inspection of all barber shops and restaurants during January and February so that any violations of the regulations may be corrected before the summer.

Inspections

Following is a report of the inspections I have made during the seven months I have been with this department:

Sanitary inspections	927
Bakery inspections	91
Poultry inspections	35
Bottling plant inspections	10
Piggery inspections	36
Stable inspections	11
Barber shop inspections	11
Store inspections	82
Restaurant inspections	25
Huckster inspections	6
Oil works inspections	4
Inspections relative to sewer connection.....	137
Inspections relative to mosquito abatement.....	88

Total inspections	1,463
-------------------------	-------

Hearings

A total of 22 hearings were held during the seven months referred to above.

Stable	3
Bakery	15
Restaurant	3
Barbers	1
Total	22

New Sewers

In the paragraph under privy vaults I suggested that you recommend to His Honor, the Mayor, that particular attention be paid to the construction of new sewers in the West Quincy section of the city. Following is a list of streets where the large percentage of the houses have no inside plumbing. The number of vaults on the streets are also shown:

<i>Street</i>	<i>No. Vaults</i>	<i>Condition of Vaults</i>
Common	29	Very bad
Filbert	13	Very bad
Cross (Common to Boulevard)	3	Fair
West	35	Fair
Conant	8	Fair
Wittiche Pl.	2	Fair
O'Connell avenue	5	Bad
California avenue	7 (double)	Bad
Bates avenue	21	Bad
Grove	20	Bad
Kent	11	Fair

The work in this department during the time I have been here has been most interesting. The members of the various city departments have co-operated with me in every case, when I requested, and I have tried to co-operate with them. Mention should also be made of the splendid co-operation of the State Department of Public Health, particularly the Engineering Division. The other members of our department have done everything within their power to assist me in my work and I am deeply grateful to them. I appreciate, also very much, the confidence that you have placed in me and trust that I have done my work to your satisfaction.

With the experience I have acquired, I feel certain that I will be better qualified during the coming year to do the work assigned to me, and consequently help make our Department of Health the best in the State.

Respectfully submitted,

A. A. ROBERTSON, *Sanitary Inspector.*

REPORT OF ASSISTANT MILK INSPECTOR

I herewith submit the following report as Sanitary Inspector, acting as Assistant Milk Inspector for the year ending Dec. 31, 1921:

The following statistics refer to milk consumed in the city of Quincy:

Number of dairies in Quincy	97
1 cow	41
2 to 5 cows.....	24
6 to 10 cows	8
Over 10 cows	24
—	
97	
Number of dairies within 10 miles supplying city...	19
Number of cows in Quincy	546
Number of cows within 10 miles supplying city	372
Milk contractors processing plants	
In Quincy	3
In Braintree	1
Average amount of milk consumed in Quincy (daily)	25255 qts.
Produced in Quincy	Raw milk..... 5250 "
Produced within 10 miles of city..	" " 2980 "
Certified milk within 28 miles.....	200 "
Grade A milk within 60 miles pasteurized....	500 "
" " " " 95 "	275 "
Family or Jersey " 60 "	5000 "
" " " " 95 "	9000 "
" " " " 160 "	2000 "
Cream consumed (daily)	315 "
Percentage of raw milk consumed.....	40
Percentage of pasteurized milk consumed.....	60
Average score of dairy inspections.....	61.05
Dairy inspections not scored	505
Dairy inspections scored.....	58
Dairy inspections outside and within 10 miles of city	12
Samples taken for butter fats and solids.....	410
Number deficient	20
Samples taken for bacteria count.....	53
Stores, restaurants and bakeries licensed to sell milk and cream	291
Number of stores inspected.....	125
Producers' milk licenses granted.....	43
Oleomargarine licenses granted.....	57
Grade A Mass. milk certificates granted.....	1
Number of conveyances for distribution of milk....	80
(Teams, cars and trucks)	
New milk rooms built.....	5
New barns built	6
Sanitary inspections	183
Restaurant and bakery inspections	31
Oil nuisance inspections	1

Spring water manufacturing plant inspections.....	1	
Ice Cream manufacturing plant inspections.....	14	
Ice Cream produced in City of Quincy.....	1230	Gallons
Ice Cream consumed in City of Quincy.....	1489	"
Stable permits granted	3	
Public hearings	3	
Court cases	2	
Office work	39	Days
Revenue received from milk and oleomargarine licenses		\$196.50

This branch of the public health work has been conducted in substantially the same manner as last year with the exception that we have a fully equipped laboratory and are now taking a bacteria count. The aim in view has been to secure for this city a clean, fresh and healthful milk supply, as well as one that would not fall below the standard prescribed by law.

With but few exceptions, the local dairies are in a sanitary condition, kept clean and well ventilated and milk rooms well screened, drained and clean.

After June 1, 1922, all dealers selling milk in the city of Quincy will have milk rooms installed. In addition, all stores where milk licenses are granted are inspected and scored.

The monthly averages for Total Solids and Butter Fats were as follows:

	Solids	Butter Fats
Jan., 1921	13.02%	4.55%
Feb., 1921	13.32	4.57
Mar., 1921	12.48	4.42
Apr., 1921	12.47	4.13
May, 1921	12.08	4.63
June, 1921	12.57	3.82
Sept., 1921	12.47	4.23
Oct., 1921	13.00	4.60
Nov., 1921	13.30	4.60
Dec., 1921	12.62	3.72
The legal standards for Mass..	12.00	3.35

Respectfully submitted,

JAS. O'DOWD,

Sanitary Inspector, Milk Division.

REPORT OF INSPECTOR OF MEAT AND PROVISIONS

December 31, 1921.

I submit herewith the report of this office for the year ending
December 31, 1921:

Inspections made 556

Meat and Foodstuffs Condemned as Unfit for Food

Financial Statement

Appropriation		\$50.00
Expended:		
Transportation	25.00	
Printing	17.35	
Telephone	5.00	47.35
Unexpended balance		\$2.65

The work of this office is divided into two parts, regular inspection of stores and markets, where meat and foodstuffs of all kinds are sold and investigations of complaints in connection with foodstuffs sold. I have attended to the first of these by devoting part time each week in making inspections at various stores. I have investigated all complaints of individual cases where the food purchased has been complained of.

The merchants of the larger stores need no reminder as to the importance of keeping their store and fixtures in a sanitary condition and their foodstuffs are wholesome and properly kept.

Owing to the gradual increase in population of our city, more small markets are opening in various sections, which has increased the work of this office.

In a few cases vigorous warnings have been given to the store keeper, which, I believe has accomplished the desired results.

I divided up my inspection work, giving more time to some sections than others, where I found conditions were not good and needed more care and attention.

Respectfully submitted,

HOWARD ROGERS, *Inspector of Meats and Provisions.*

REPORT OF VENEREAL DISEASE PHYSICIAN

Since its inception September 16, 1921, 20 patients have been attended at the Venereal clinic at the Quincy City Hospital.

Some of the cases have been referred to the clinic by private physicians for diagnosis (by means of the Wasserman reaction or darkfield microscopic examination); others from the hospital wards; one case came to me from the overseers of the poor; and still others from various city, county, and state institutions, all, however, being residents of Quincy.

For economic reasons it was decided to seek the co-operation of the hospital department and establish the clinic where an autoclave, still, and other necessary and expensive apparatus for sterilizing was available, rather than make duplicate expenditures for similar articles for the Dispensary, where these items are not a feature of the equipment.

I hasten to state that this co-operation was extended to me in unstinted measure by the Board of Managers and the Superintendent of the Hospital.

Of the 20 cases examined, six patients gave a positive Wasserman reaction, indicating the presence of syphilis. One of these patients has not returned to the clinic since and one has been transferred to a government hospital after a single course of treatment. Three of the twenty were cases of gonorrhoea. Two giving negative Wasserman reactions had been treated elsewhere, making a total of 11 cases of venereal disease out of 20 cases examined.

The five cases of syphilis treated in the clinic have received a total of 37 arsphenanim ("606") injections, and 47 injections of mercury in conjunction with any other treatment required in the individual cases.

None of my cases have negative blood tests as yet, but since 4 out of the 5 were of at least 10 years' duration without any treatment whatever, and the fifth case one of congenital syphilis, likewise untreated, I consider it too early to expect any such result.

I feel that while this is a very small beginning, that it is a very important public health measure, that I am not infringing on the domain of the private physician, inasmuch as few are equipped and many practitioners are not interested in the subject.

Moreover, existing law puts the onus of reporting these cases upon the physician, a responsibility which he does not like to incur. Therefore, I submit, that far from taking these patients away from anyone, we are simply performing a duty which would otherwise remain undone.

EDWIN E. SMITH, M.D.

REPORT OF CONTAGIOUS DISEASE NURSE

I respectfully submit herewith the report of the Department for Communicable Diseases for the year 1921:

Approximately 2,500 visits to homes in every part of the city were made in connection with communicable diseases during the year 1921.

Visits are made by the nurse immediately on report of the case to the Department of Health to ensure the patient is being properly cared for and kept in isolation, to prevent the spread of the disease to others, to teach the methods for prevention and to give aid in any way she can.

She keeps in touch with the case from the time it is reported to the health authorities until the release from quarantine.

There was reported a total of 1,129 cases of communicable diseases with only 20 deaths, including those taken to the contagious hospital at Brighton, a record of which the department is justly proud.

At times stringent measures are necessary in order to secure the proper co-operation from the people whose families are visited by contagious diseases. Should people give this co-operation willingly an even better showing could be made by this department.

In the spring an outbreak of measles occurred in the north end of the city, and at once the efforts of the Health Department with the able assistance of the school physician and nurses were directed to that part of the city and the schools.

As the cases were reported the homes were visited by the nurse, and all persons having measles were isolated, while suspected persons and those who had been exposed were quarantined.

In a great many cases people do not seem to realize the necessity of quarantine or in reporting the disease when a physician does not attend the case.

Lack of co-operation accounts somewhat for the large number of cases.

In March, 16 cases were reported, then the numbers gradually increased until the disease reached its height with 240 cases reported in May. From that time there was a marked decrease until October and November, when only 23 cases were reported for the two months.

Another outbreak of measles has been noted in December as at the close of the month 53 cases have been reported. The greater number of these cases were reported from that section near the Milton line and the disease seems to be spreading through Wards 4 and 5.

Fortunately, however, the disease is of a mild type and no deaths have been reported during the year.

The two schools chiefly affected were visited and inspected by Dr. George O'Donnell of the State Department of Health, Dr. Fred E. Jones, Health Commissioner, and Dr. Maria E. Drew, School Physician.

The chart comparing contagious diseases for the last ten years shows that this disease seems to become epidemic every three and a half years.

In November an outbreak of diphtheria was apparent in Ward

2, and although much less severe than the rumors which spread through the district would lead one to believe, it was enough to cause the Health Department to use stringent measures to enforce quarantine.

Steps were taken to control the epidemic by isolation and quarantine of all positive cases and carriers, cultures of all members of families were taken where a positive case was found and in all suspected families.

Cultures were taken in school-rooms where a case had occurred and all suspects sent home by the school physician or school nurse. One school teacher in this district contracted the disease and was quarantined. Several families were found with two or more positive cases, and in one instance a whole family was affected.

Careful investigation traced the cause of the outbreak to three diphtheria carriers, two of whom were found by culturing in school room, the other by being cultured in the Boston Dispensary and reported to the Quincy Health Department. These cases being immediately isolated and cared for, the epidemic subsided.

During a period of 8 weeks there, 31 cases were reported in Ward 2 with 4 deaths, including those taken to Brighton.

Not having a hospital in our own city to care for communicable diseases, the cases are sent to the Massachusetts Homeopathic Hospital for contagious diseases at Brighton.

During the last year 48 cases of diphtheria, 6 cases of scarlet fever and 1 case of whooping cough were cared for at this institution, with a total cost of \$3,512.00.

The average cost per patient for scarlet fever is \$85.00.

The average cost per patient for diphtheria is \$40.00.

The average length for scarlet fever isolation is 6 weeks, and for diphtheria two weeks. However, one case of diphtheria has been at the hospital since May 24, 1920. This child has paralysis and necessitates hospital care.

A word of appreciation is extended to Dr. Fred E. Jones for his kindly assistance and advice as Commissioner of Health and to the physicians throughout the city for their hearty co-operation during the year.

Respectfully submitted,

RUTH W. BEAN, R. N.

REPORT OF TUBERCULOSIS PHYSICIAN

I respectfully submit the report of the Quincy Dispensary for the year 1921.

At the Quincy Dispensary on High School Avenue a clinic is held every Tuesday from six to seven in the evening.

Fifty clinics were held during the year and two hundred and eighty-one patients were examined by me.

Two hundred and thirty were re-examinations.

Ninety-one sputum tests were sent to the State Department of Public Health for examination.

The number of cases in hospitals and state sanatoriums were as follows:

Westfield State Sanatorium, 4 patients, average per year 2½ patients, cost per week \$4.00.....	\$524.38
Rutland State Sanatorium, 6 patients, average per year 3 patients, cost per week \$4.00.....	649.14
Lakeville State Sanatorium, 7 patients, average per year 3½ patients, cost per week \$4.00.....	705.13
Plymouth County Hospital, 2 patients, average per year 1 patient, cost per week \$9.10.....	646.10
Holy Ghost Hospital, 2 patients, average per year 2 patients, cost per week \$10.00.....	1,000.00
(No cases at present at this hospital)	

Norfolk County Hospital, 34 patients, average per year 17 patients, cost per week \$9.10.....	\$8,145.90
Assessment of Norfolk County for this hospital for the year 1921 was	28,258.15

Total cost	\$36,404.05
Less State subsidy paid to city of Quincy.....	3,447.85

Actual cost to city of Quincy	\$32,956.20
-------------------------------------	-------------

Or at an actual cost per week per patient of \$36.85.

Reports of Quincy cases in sanatoria for 1921 show:

Discharged arrested	10
Discharged unimproved	18
Absconded	4
Deaths at hospitals or sanatoria.....	30
Number of deaths in the city	29
Number of cases reported during the year.....	61
Number of cases now in sanatoria:	
Norfolk County	18
Westfield	2
Lakeville	2
Rutland	4
Plymouth County	1

Approximately 1,137 home visits were made by the nurse during the year. These included dispensary cases and those who were under the care of private physicians and who requested the nurse to visit them.

All pulmonary cases were given sputum cups and were in-

structed by the nurse in the care of the sputum and in general hygiene.

I have advised sanatorium treatment in all positive cases, as their removal, especially where there is a large family, may prevent many cases of infection which can be then avoided.

During the months of July and August a survey of Ward 4 was made under the direction of Miss Margaret C. Howard, assisted by the nurse. This report is now in the hands of the Mass. Tuberculosis League. No new cases were found.

It seems to me that we can still accomplish a great deal in eradicating tuberculosis from Quincy. This will require a lot of co-operation from the physicians of Quincy. How this can be best accomplished is by the follow-up work of the nurse. Suspicious or pretubercular cases are prone to see the physician once and if not followed up the disease may make rapid progress without being realized.

The nurse is always at the call of the physician and I would ask all interested in this work to give all possible aid to such cases. No person is refused careful examination at the Dispensary.

I wish to thank the doctors, school nurses and Social Service workers for their hearty co-operation during the past year.

Respectfully,

WILLIAM J. McCAUSLAND, M.D.

REPORT OF CHILD WELFARE PHYSICIAN AND NURSE

As Child Welfare nurse, I have the honor to submit my second annual report for the year of 1921.

By the large increase in the clinic attendance in the past year, it has brought to the realization of Quincy how much the Child Welfare work is relied upon to aid in the health of the future generations.

It is a great hope that through this work we may cause a marked decrease in infant mortality, which has been needlessly high, due greatly to the lack of knowledge in "Prenatal Care."

Through the Child Welfare clinic, this is made possible by giving prenatal advice, home visits, and literature, which is issued by the State Department of Health. There were 78 prenatal visits made.

Every mother in the city of Quincy is invited to these Child Welfare clinics, with her baby or children of pre-school age, that we may aid them in protecting these, our future generation, from the ills of infancy and early childhood, by giving them a good start, that our city may boast of well babies, strong boys and girls, healthy men and women, and in a few short years, good citizens.

Weekly clinics were held throughout the year, at the Quincy Dispensary, on High School Avenue, where babies were weighed and examined and advice and instruction given to mothers on medical care, hygiene and sanitation and preparing formulas.

There were fifty-one clinics held with a total attendance of 1,220. Doctor F. Ramon Burke, as examining physician, made a total of 591 examinations. Of those examined, there were forty admitted to the tonsil and adenoid clinic, at the Quincy City Hospital, for the removal of tonsils and adenoids. Preparation for the admittance of these children to the hospital was made through the clinic.

There were 19 children treated at various hospitals.

Temporary homes were found for five babies.

An offer of space in which to carry on clinic work was made by the pastors of the following churches; was accepted and clinics started and held weekly as follows:

On Tuesday, September 20, 1921, a clinic was started at the Methodist Episcopal Church, Atlantic. There were 14 clinics held with a total attendance of 166. Doctor William R. Hurley very kindly volunteered his services as examining physician, making a total of 60 examinations.

On Monday, October 19, 1921, a clinic was started at the Methodist Episcopal Church, West Quincy. There were eight clinics held with a total attendance of 47.

On October 21, 1921, and every Friday clinics were held at the Community Church, Quincy Point. There were eight clinics held with a total attendance of 71.

On Labor Day, September 3, 1921, a Baby Clinic Prize Contest was held under the auspices of the American Legion. There were 135 babies weighed, all under two years of age. Volunteer physicians examined each of these babies. Volunteer nurses weighed children over two years of age.

Wednesday, November 9, 1921, the Ladies' Aid of the Univer-

salist Church held a Baby Show Prize Contest, in charge of the clinic nurse, and thirty-five babies were weighed.

There was a total of eighty-three clinics held with a total attendance of 1,674. There are now four weekly clinics being held.

There were eight hundred and sixty-five home visits made to babies. This is called follow-up work of the clinic. Advice and instruction are given at these home visits.

There were thirty-seven babies referred to their family physicians, twenty-five were referred to the clinic by family physicians, and fifteen were referred to health stations of other cities and states.

There were two sick babies aided through the Health Department.

The co-operation of the Overseers' Department, the Visiting Nurses' Association, Associated Charities, various hospitals and health stations, physicians, private organizations and churches has been unusually good.

The growth in the past year gives great promise of a larger field for health education along this line for the year 1922.

Respectfully submitted,

NETTIE H. DENTON, R. N.

Suggestion

Facilities for the Welfare Nurse to assist more homes is extremely necessary. At present she is able to visit only two or three homes a day. Home inspection is one of the most important phases of the work.

Milk stations shall be secured for distribution of proper milk and financial aid given when needed to procure such milk.

(Signed)

F. RAMON BURKE, M.D.

		factory, old building....	1

The increase in the amount of plumbing work installed over the previous year is quite noticeable. The number of new dwellings for which permits were issued was eighty-five. Old dwellings and other buildings one hundred and eighty-one more than last year, with an increase in revenue for permits of \$370. All cases of violations of the ordinance have been rectified in most cases promptly upon proper notice from the department. There were two cases which were prosecuted and convictions secured for installing plumbing work without a permit the parties not having a master plumber license. Changes were later made in this work to conform with the law by plumbers authorized by law to do plumbing work. The plumbing ordinance of our city, in my opinion, compares favorably with the latest sanitary ideas on modern plumbing, although there could be a few changes made which in some cases would be helpful to the plumbers installing the work and still keep the ordinance up to a proper standard. But I do not think that the changes that I have in mind are of importance enough to ask the City Council to amend the ordinance at this time, as there is a bill now before the Legislature which was referred from last year calling for universal laws on plumbing in this state, which I think may be accepted. In a number of Plumbing Codes a safety device is required to be placed on all range pressure boilers called safety or relief valves as a protection when boilers become overheated, which happens in most all cases with boilers heated by gas and neglecting to turn off the gas when through using hot water. There has been quite a number of explosions from this cause, one in this city that I know of. There is no question of the danger when boilers are overheated. The question in my mind is are the occupants safe from boiler explosion when any of the safety valves that I know of are installed, as they cannot be relied upon to open when the temperature in the boiler reaches the danger point. The same opinion prevails with a great many plumbers and plumbing inspectors. There is now on the market a safety valve which is opened by excessive heat, which is spoken very favorably of by people that have seen tests made of this valve. It is my intention to make a special investigation of this and other valves that I may be convinced that when we call for the use of safety valves there will be some reliability that they will open when danger arises from the boiler overheating.

The regulation put in force this year for the construction and location of cesspools has made a great improvement in all cesspools built this year. Previous to the requirements now in force, the poor manner in which some cesspools were built was the cause of a great many complaints to the department.

I wish to thank you for kind co-operation in all questions that have arisen during the year, in connection with my work, the result of which in most cases has been of great help in settling the same in a satisfactory manner.

Respectfully submitted,

J. J. KENILEY, *Inspector of Plumbing.*

REPORT OF INSPECTOR OF BUILDINGS

January 1, 1922.

Hon. William A. Bradford,
Mayor of Quincy, Mass.

Dear Sir: In compliance with the requirements of the Building Ordinance, I hereby submit the annual report of the Building Department of the City of Quincy for the year ending December 31, 1921:

Permits Issued

290 Dwellings	\$1,295,050
15 Cottages	9,700
34 Mercantile	109,457
15 Manufacturing	17,155
42 Stables, etc.	8,260
390 Auto Houses	187,972
257 Alterations	238,230
47 Removals	24,140
14 Miscellaneous	21,850
2 Elevators	3,200
1106	<u>\$1,902,397</u>

Statement

Cash received each month for permits issued January 1, 1921, to December 31, 1921, inclusive, and paid to City Treasurer.

January	\$56.50
February	53.00
March	188.00
April	208.50

Electrical Fires

Electric wires were reported to have been the cause of eight fires in 1921; and investigation disclosed that four resulted from careless use of electric pressing irons, one from overfused circuit, one from service wire coming in contact with trolley wire and one

resulted from some other cause, or that the evidence of its origin had been destroyed by fire.

The Department again wishes to call the attention of all who use electricity for light, heat or power, that due care should be exercised in replacing "blown" fuses by others of proper capacity and in keeping with the amount of current to be used. No branch lighting circuit should be fused for more than "10" amperes, and no work should be performed on electrical systems except by men of experience and judgment, and only after a permit for same has been issued by the Department of Inspector of Wires.

During the year 1921 this department made 4,252 inspections of wiring and appliances used for light, heat and power; these included inspection in 375 newly constructed buildings and in 427 old buildings which were wired during the year. The balance of the inspections were made in buildings where additional wiring was installed on existing electrical systems and where the old wiring was installed before inspections were inaugurated.

With the assistance of an inspector from the New England Insurance Exchange, reinspections, were started in February, 1921, on all the installations in mercantile buildings, manufacturing plants, also the city property, and many serious defects were found in the wiring in these buildings and notices of same were sent in each case to the owners. The department was conservative in its rulings and did not condemn work or material that was safe and in good condition, even though they did not conform to the present requirements. The object of the reinspection was not to cause all wiring to be brought up to the present requirements as the cost in many cases would be prohibitive, but merely to make everything safe from the point of view of danger to life and property; although all changes were made according to the present regulations. Most of the defects were remedied within a reasonable length of time, some still exist, but will no doubt be remedied within the coming year, except in such cases where the use of the wiring may be discontinued. Installations that are discontinued cannot be reconnected until the defects are corrected.

Dwelling houses, schools and other city property still remain to be reinspected, but this work cannot be done without assistance. A comparison of the number of defects found in the reinspection relative to the number of inspections, with the number of defects found in new work, shows conclusively the greater danger that exists in old wiring.

	No. of Installations	No. of Inspections	No. of defects	Average defects per installation
New Inspections	1,476	3,727	955	0.7
Reinspections	265	525	1,021	3.8

The comparison is the more detrimental to the old wiring when it is considered that many of the defects in the new work are minor violations of the requirements to which attention is called in order that the installation may be as perfect as possible at the beginning, while nearly all the defects in old wiring are serious and materially affect the safety of the installation.

Respectfully submitted,

FRANK LINTS, *Inspector of Wires.*

REPORT OF BOARD OF SURVEY

January 1, 1922.

To His Honor, the Mayor,
and Members of the City Council.

Gentlemen: The Board of Survey respectfully submits herewith its seventh annual report for the year 1921.

The Board organized January 10, 1921, with Eugene R. Stone as chairman and Patrick F. O'Brien, as clerk.

Eugene R. Stone was reappointed to the board for a term of three years.

The board held eight meetings during the year and approved five layouts.

The value of the board was demonstrated during the year as three of the layouts were modified and made to conform to the rules of the board of survey and avoided dead end streets.

Respectfully submitted,

EUGENE R. STONE, *Chairman.*

HERBERT S. BARKER.

WILLIAM H. TEASDALE.

Board of Survey.

PATRICK F. O'BRIEN, *Clerk.*

REPORT OF DOCK AND WATER FRONT COMMISSIONER

Quincy, Mass., January 1, 1922.

Received by Water from January 1, 1921, to January 1, 1922

At Quincy Point Power Station.....	10,410 tons coal
Valued not received.....	45,582 bbls. fuel oil
At J. F. Sheppard & Sons, Inc.....	25,305 short tons coal
Approximate value.....	\$263,545
At Quincy Lumber Co. wharves.....	1,726,009 feet lumber
Approximate value.....	\$65,000

Total number of vessels of all kinds passing through draw
at the Fore River bridge 2,043
Report not received from City Fuel Company.

Respectfully submitted,

E. M. WIGHT, *Commissioner.*

REPORT OF ENGINEERING DEPARTMENT

January 1, 1922.

To His Honor, William A. Bradford, Mayor,
and Members of the City Council.

Dear Sirs: I herewith respectfully submit the twenty-second annual report of the Engineering Department for the year ending Dec. 31, 1921.

The following is a statement of the work done by this department during the year 1921:

Street lines have been given at the request of property owners of 150 estates.

Plans and estimates have been prepared by the engineering department as follows:

Proposed new streets.....	20
Proposed street widenings.....	4
Proposed building lines.....	4
Plans for City Planning Board.....	2
Plans for Board of Survey.....	2
Plans for legislative hearings	6
Assessors' plans	40
Miscellaneous	50

New Streets

During the year there were petitions for the acceptance of 51 streets at a cost representing \$300,000, but owing to the limited amount of money available for that purpose only 18 streets were accepted.

These streets were built with bituminous macadam roadway, gravel sidewalks, with loam areas, sewer, water, gas and drainage pipes installed before finished surface was put on street.—See schedule.

Rebuilding Streets

During the year there were requests and petitions for the rebuilding of 55 streets at a cost aggregating \$500,000, but as there was only a limited amount of money available only 15 streets were rebuilt.

In selecting streets to be improved it was the idea to rebuild through streets so as to make travel easy across the city.—See schedule.

Hancock Street

The improvement of Hancock Street was under discussion during the year and \$35,000 appropriated to have the street rebuilt be-

tween the Metropolitan Boulevard near the Atlantic Railroad station and Squantum Street, at Barry's Corner. Between the railroad bridge and Barry's Corner the foundation in part is of a salt marsh nature and the present street has been settling gradually since widenings have been made. To decide what type of roadway would be best to build under these conditions the Mayor had the services of expert advice and is now ready to proceed as soon as weather conditions will permit.

Willard Street

The State Highway Department built a concrete roadway on Willard Street, between the Braintree line and West Street in the City of Quincy, a distance of about 3,000 feet. The City of Quincy agreed to rebuild the part from West Street to the Milton line. The part between Robertson Street and the Milton line was rebuilt this year at a cost of about \$12,000.

Surface Drainage

The sum of fifty thousand (\$50,000) dollars was appropriated for surface drainage. The area adjoining the Quincy Shore Reservation was drained besides the drainage of 17 newly accepted streets.

Furnace Brook was cleaned and improved from Newport Avenue westerly to Adams Street and from near Crescent Street, southerly to railroad bridge over the Furnace Brook Parkway.

The Furnace Brook culvert under Newport Avenue was too small to allow the free flow of water during flood periods and is now being enlarged.—See schedule of drains.

Elimination of Grade Crossings

Nothing was done on the elimination of grade crossings in the City of Quincy this year. The New York, New Haven and Hartford Railroad Company pleaded poverty and that the condition of the labor and supplies market did not warrant doing anything at this time.

Permanent Sidewalks

At the earnest request of residents granolithic sidewalks were built on the following streets:—See schedule.

Play Grounds

Owing to the new law allowing games to be played on Sundays, an added interest was taken in sports and the City Council made appropriations for improving the playgrounds in Wards 2, 3, 4 and 6.

For financial statement see City Auditor's report.

Yours respectfully,

PATRICK F. O'BRIEN,
City Engineer.

THE FOLLOWING STREETS HAVE BEEN LAID OUT DURING THE YEAR AS PUBLIC HIGHWAYS

<i>Street</i>	<i>Location</i>	<i>Ward</i>	<i>Length</i>	<i>Width</i>	<i>Appropriation</i>

REPORT OF PLANNING BOARD

To His Honor the Mayor and Members of the City Council.

Gentlemen: The seventh annual report of the City Planning Board is herewith submitted.

The chairman and clerk were re-elected, and Mr. James E. W. Geary was reappointed to membership for five years.

Nine regular meetings have been held and it has been the endeavor to consistently follow the date of the first Tuesday in each month. In addition to the regular meetings the Board has taken several views of matters under consideration, notably the site for the Comfort Station at Houghs Neck and the possible eventual route of the Pilgrim Highway.

The Board has also through its chairman and clerk viewed and passed upon sites for the various memorial signs in squares named for heroes of the great war.

This year has seen completion of Willard Street from West Street through to Braintree by the State. This artery should become better known to cities and towns to the south as the direct thoroughfare to Boston. In the summer season it is a route of especial scenic beauty to our own citizens.

In this connection might be stated here that a matter in which Braintree is particularly interested is the continuation of an automobile road through the southerly edge of the Blue Hill Reservation connecting Five Corners, so called, with Green Lodge Road in Milton, making a new thoroughfare direct to Dedham.

Our plan of the building line on Temple, Washington, Hancock and Maple Streets has been accepted and with North Street will make the much desired safeguard in these thoroughfares. We can only urge that the authorities determine upon their own initiative what is best in the way of lines upon Franklin Street and place them accordingly. There will always be differences of opinion from abutters and the public convenience should not be blocked by dissensions of individuals.

It is very evident that the unusual and extensive appropriation for the new High School building takes precedence over lesser requirements of the city and that the alterations in the auditorium at City Hall will help, but there is still the ever present knowledge that a new City Hall must come; a Police Station, and at least two Comfort Stations should soon be provided for.

The Board has prepared and completed a large scale map of the business portion of the city extending from Butler Road on the north to Elm and School Streets on the south, and lying between Valley Street on the east, and Presidents Hill on the west. This will be used in the study of requirements in the way of these new public buildings and later to assist in zoning the city.

In collaboration with Inspector of Buildings Warren S. Parker a plan for industrial zoning within the city has been worked out.

The matter of residential and business zoning will require a long period of intensive consideration.

Following the determined stand of the State Federation of Planning Boards we are in harmony with our local licensing board regarding the restriction of billboards within the city limit.

In accordance with our standing suggestion that 2,000 pine trees be planted each year for three years, Superintendent Andrew Stewart of the Park Department procured them from the State and they have been added to those of 1920 in Faxon Park. We wish here to issue a note of warning looking to their protection. Several hundred have been destroyed by unwarranted brush fires and trees have been uprooted, we will say charitably, through the heedlessness of visitors in the park. It has been arranged that this section shall be covered by State signs for the future and we ask the co-operation of all those who use the park in seeing that their instructions are carried out.

A new bill will be presented to the coming Legislature for the consideration of our Pilgrim Highway. Plans have again been modified upon this as will be seen by our accompanying map. The changes have been beneficial both as to location and cost. By a short look into the future our neighboring city of Brockton, which also feels the congestion of Cape traffic, can see that it would be relieved of the major portion of this by co-operation in our plan to eventually have this highway carried through to Quincy Avenue. The course of traffic made possible by the Old Colony Boulevard and the new Neponset Bridge will naturally swing along Quincy Shore thence through to the Cape both by the way of Plymouth and through Abington, Bridgewater, Middleboro and Wareham.

New private developments of large tracts within the city are under way and it would seem that the residential growth of the city in the next few years is to be phenomenal. Development of a far-reaching nature will ensue if plans now under consideration are carried out in the drainage of the meadows on Coddington Street. With the generous gift of the plot upon Woodward Avenue adjoining Faxon Field this area is thrown open to the High School lot.

By carrying drainage to the outfall in the rear of the City Home instead of into the canal a drop of three feet is gained and by a double system of piping the surface water can be handled from City Square and beyond, with drainage of the meadow assured. There are extensive possibilities in the improvement of this level tract so convenient to the centre of the city.

In the opinion of this Board the property about the City Home should be retained only for purposes of the Home. The City Stables and Municipal Garage with their adjuncts should eventually be removed to a more convenient location, preferably near the railroad. We have the opinion of an expert interested in the growth of the city that development in this direction is the natural gateway of Quincy towards its water front.

The Planning Board was represented at Winchester for the sessions of the State Federation of Planning Boards by invitation of the Governor. Wollaston was favored early this season by an instructive address on City Planning and zoning by Flavel Shurtleff of the National Association. Our Board has taken membership for the coming year in the National Association and the times

point to a more active and intelligent understanding of City Planning by those who give it thought.

We want to see the Black's Creek dam a reality with all improvements it means along the margin of that basin.

Our frontispiece is a photograph of the new High School. With the removal of the former Home Making School building from the front of the Coddington School we shall have a dignified grouping of public buildings upon that side of Coddington Street.

The photograph of the Parkway branch of our Public Library at West Quincy shows progress Library Trustees are making—and more to come.

Much good has come of State and District conferences among our Planning Boards and it is our intention early in the coming year to invite the Weymouth and Braintree Boards and a representative from Milton to a District Conference.

The subject of suitable locations for Robert Burns and Dante Memorials is still before us and will require further consideration to obtain such ample and satisfactory surroundings as they would require.

Respectfully submitted,

CITY PLANNING BOARD,

WILSON MARSH, *Chairman*,
EZEKIEL C. SARGENT,
JAMES E. W. GEARY,
EDWARD E. PALMER,
CHARLES H. FINN.

PATRICK F. O'BRIEN, *Clerk*.

FORE RIVER BRIDGE

FINANCIAL REPORT OF THE TRUSTEES OF FORE RIVER BRIDGE FOR THE YEAR ENDING DECEMBER 31, 1921

Receipts:

Balance, cash on hand January 1, 1921.....	\$295.18

MOSES L. BROWN.

REPORT OF THE SEWER DEPARTMENT

(For Financial Statement see Auditor's Report)

This year common sewers were built in forty-two different streets in various sections of the city. In consideration of a policy the city is endeavoring to carry out, that is, the installation of all public utilities previous to the permanent improvement of the street surface, common sewers were built in the following named streets: Beale Street, Billings Street, Buckingham Road, Canal Street, Carle Road, Centre Road, Colby Road, Grafton Street, Summit Avenue, Waterston Avenue, and Wendell Avenue. House connections to all existing buildings were also made at the same time. This is a remarkably good policy and should be maintained each year.

Four and nineteen one-hundredths miles of sewers were laid as shown in detail on the appended schedule.

Particular Sewers

A departure was made this year from the old methods of installing house connections. The practice of apportioning the cost of this work over a period of years at the request of the individual was abandoned, and instead a deposit of \$50.00 must be made at the time of application or previous to the starting of the work.

This method does away with slow collections and saves a considerable amount of clerical work in connection with a large number of comparatively small accounts. The amount of deposit as fixed this year was sufficient in 90 per cent. of the connections installed, to more than cover the cost. On the whole it has worked out very satisfactorily.

Number of connections made	341
Average cost per connection	\$40.43
Average length of connection.....	43.77 ft.
Average cost per foot9238

House connections in wards as follows:

Ward 1.....	76	Ward 4.....	17
Ward 2.....	11	Ward 5.....	151
Ward 3.....	24	Ward 6.....	62

Maintenance

The work of cleaning, flushing and general maintenance has been carried on this year as usual. This work is reserved as far as possible for the winter season when the department is not busy on new construction work.

Assessments

Our record plans for the year 1921 were far enough advanced so that the department was enabled to make up and send out early in January, 1922, a betterment tax of \$30,597.55, covering all the streets that were sewered in 1921.

MOSES L. BROWN,
Commissioner of Public Works.

REPORT OF PARK COMMISSIONERS

January 25, 1922

To His Honor the Mayor:

The Board of Park Commissioners begs leave to submit the following report for the year 1921:

Merrymount Park

Owing to the fact that the annual appropriation fell far short of the amount necessary to take proper care of this park, only the very urgent needs were looked after. There was an unusual demand for permits for the use of baseball and football fields, but the Commissioners were unable to keep the fields in shape late in the season, owing to lack of funds. Quite a lot of annoyance was caused the players by the fact that very many field days were held on upper Merrymount on Saturdays.

I would offer a suggestion that some plan be worked out whereby a permanent bandstand be erected on the farther field, and a suitable road leading to it be constructed. According to the City Engineer, the building of this would not be a large item of expense. The field mentioned overlooks Black's Creek and is in close proximity to Pine Island, to which island the Planning Board has repeatedly suggested building a bridge, and would be an ideal place for band concerts, field days and gatherings of all kinds.

A large tract of land on Fenno street was leveled off and a foundation for tennis courts put in, which courts will be built when there is an appropriation for the same.

The Board would again call attention to the condition of the road through the park from Fenno Street to Park Lane. It is in horrible condition, unsafe for automobiles and ought not to remain in its present state.

Playgrounds

Owing to the special appropriations by the City Council, the playgrounds at Wards 2, 3, 4 and 6 were wonderfully improved.

The level of the ball field at Ward 3 was raised, and now, except after exceptionally heavy rainfalls, such as we had a few times last season, the field can be played upon at all times.

The ball field at Ward 4 was enlarged considerably and the level of the outfield raised so that the fielders now do not have to stand up to their knees in water while playing baseball. A large area on the Furnace Brook side was filled in with granite and gravel, making a suitable place for the handtubs to have playouts, and a concrete platform was built for the tubs to stand on while being pumped. When the plans for taking care of the water in

Furnace Brook are completed and the work done, Ward 4 will have an ideal athletic field.

The ball fields at Ward 2 and Ward 6 were leveled and put in as good condition as the funds would allow.

Public Bathhouse

This very popular institution had another successful season. Owing to the great demand for lockers, a time limit was put on the bathers, and still they were uncomfortably crowded, especially on the women's side.

A special appropriation for reshingling part of the roof was made late in the fall, and the work will be done in the early spring.

Two large rafts were purchased and placed at the foot of River Street to accommodate a large number of bathers in that vicinity, which relieved the congestion at the bathhouse somewhat. There is quite a demand for bathing-rafts in other sections of the city, the placing of which would give pleasure to numbers of people who live at some distance from the Town River Bathhouse.

Supervised Playgrounds

It is pretty well agreed among thinking people that on the growth and physical education of the young children depends the welfare of the nation, and hence it is needless to speak of the beneficial results obtained from the supervised playgrounds. The eagerness and activity of the children, and the attendance each day tell the story.

Mr. F. N. Nissen was our playground director, and he was assisted by a very energetic corps of instructors, who made the work and games so interesting there was an average daily attendance of over 500 during the eight weeks of the summer that the playgrounds were in operation.

It is very desirable that a playground be put in operation in Ward 1, but at the present time there is no suitable place available. Faxon Field, on Coddington Street, when developed, will be a wonderful location for one.

All these suggestions are respectfully submitted for consideration when the annual appropriations are being considered.

Very truly,

JAMES H. SLADE,

Chairman Park Commissioners.

REPORT OF HOSPITAL DEPARTMENT

February 7, 1922.

To His Honor the Mayor and Members of the City Council.

Gentlemen: The Board of Managers of the City Hospital respectfully submit the report of the hospital for the year ending December 31, 1921, this being the 32nd annual report since its founding in 1889, and the second issued while under city control.

During the year eleven meetings have been held, usually on the second Tuesday of the month. Changes in the personnel have occurred in the retirement at the expiration of his term of our valued associate, Mr. F. Charles Barnicoat, and the appointment of Mr. Gustaf R. Blomquist.

Admissions of patients during the year numbered 1,832, as compared with 1,633 for the year 1920, an increase of 199, although by reason of the shorter average stay the total days' treatment shows a decrease. As the maternity ward and private rooms are constantly filled many of our citizens are compelled to seek other hospitals on account of our limited capacity. This present inability to give our people the service they deserve will be intensified both by the resumption of activity in the great industrial plants of the city and in the normal rapid increase in our population.

While we have been able to effect considerable saving over the preceding year, this has been largely due to the gradual reduction in the price of commodities. The fundamental fact remains, however, that the overhead expense will continue to be unduly heavy until facilities are provided for more efficient current operation by a well-equipped modern service building and for increased revenue by a new pavilion. Before proceeding to the consideration of the new service building let us briefly outline the disadvantages of the present layout. First, the power plant, located in the basement of the old laundry building, was installed thirteen years ago, and since that time the Nurses' Home and the surgical building on our own grounds, and the 12-room house on the opposite side of Whitwell Street, which the city rents for an overflow nurses' home, have been connected one by one to the heating system. The result has been that the two overloaded boilers have to be forced to the utmost in severe weather, with absolutely no reserve in case of breakdown. This is a grave situation which should not be allowed to continue for another winter. The plant has been kept going only by constant attention and by excessive expenditures for repairs, temporary in their character, for no sooner are defects in one place remedied than some other part of the system gives out. During the past year repairs on the heating and plumbing alone have cost in excess of \$1,800.

Second, the laundry, situated over the boiler plant, is in contracted quarters and filled for the most part with obsolete and worn-out machinery. So much for our present service building.

The kitchens, designed to accommodate the original hospital, which comprised only the present administration building and the one small frame ward, have long been outgrown and are dark and inconveniently located in the basement near the main entrance. As to dormitory facilities, we are now renting three houses outside of the hospital grounds, one directly opposite on Whitwell Street, containing 12 rooms, one on the corner of Whitwell Street and Roslin Avenue, and still another on Curtis Street, at a total expense of over \$3,000 per year. The traveling back and forth of our hospital employees to these several places in all sorts of weather means undue exposure, wasted effort and lessened efficiency.

To overcome these deficiencies and as a sound business policy, we recommend the immediate construction of a fireproof service building of brick, as shown on the proposed plans, with the concentration under one roof of power plant, laundry, kitchens, storerooms and dining-rooms, and with the utilization of the third floor for much needed dormitories. This building should then function as follows:

Referring to the ground floor plan: all stores for both kitchen and hospital, and all articles to be delivered to the hospital, would enter at the kitchen entrance approached through the service yard. This entrance would at all times be under the direct control of a storekeeper whose office is indicated. From this entrance, supplies would be directed either to the refrigerators, storerooms, or to that portion of the hospital for which they were destined.

One of the most important questions governing hospital maintenance is the question of service and handling of food. In the building as planned, the course of food from its raw to the cooked stage is as follows: Sufficient supplies would be removed from the main storerooms or refrigerators in the ground floor, under the supervision of the dietitian or the person in charge of the kitchen, and stored in the daily supply room as indicated on the first floor plan, and under the direct control of the person in authority. As required, these supplies would be removed, prepared in the space designated for this purpose, and cooked either in the ranges or in the steam-cookers. The bread and pastry would be prepared in that portion of the kitchen reserved for this purpose. In the handling of cooked food at the present day, the most satisfactory and accepted form is dependent upon the use of individual food cars, in which the cooked food is maintained at the proper temperature by means of the fireless cooker principle. A proper number of these food cars would be stored in the serving space, and when required, and at the proper time, would be filled with the cooked food and diets, placed in the elevator and brought to the ground floor, from whence they would be distributed to the various serving kitchens in the different pavilions, and food there transferred to the steam-tables provided. At these points the individual trays for the patients would be prepared.

The handling of food for the nurses, staff, and servants is provided for as follows:

From the main serving table in the kitchen the food would be carried to steam-tables in the serving room indicated, and thence served by cafeteria to the servants, and by waiters to the nurses and staff.

The theory of service designated for in the laundry is more or less self-evident from the plans. In other words, soiled linen from the hospital buildings would be brought to the sorting bins in the washroom, and by direct process soaked, washed, partially dried, and starched, if necessary, proceeding thence to the ironing room and clean linen room respectively. In the clean linen room provision would be made for the necessary repairs to the linen, and proper storage space provided to accommodate the main linen supply of the hospital. This room would be under the control of some person in authority at all times, and linen would be dispensed to the other linen rooms of the hospital upon requisition.

The architects' estimate of the cost of this building, including equipment and furnishings, complete and ready for operation, based on a unit price of 40 cents per cubic foot, is \$89,100. This is a reduction of at least 20 per cent. from a year ago, while interest rates on Municipal Bonds will show a like saving.

In view of these facts, and taking into consideration that the building as designed will have sufficient capacity to take care of hospital additions for many years to come, we confidently assert that it will be a good financial investment for the city; greatly improving the service in every department, reducing waste, increasing the efficiency of the heating plant and laundry, giving ample storerooms for the purchase of supplies by wholesale, and effecting a saving of many hundreds of dollars yearly in repairs, coal and rent.

On the completion of the service building as outlined above, a still further reduction in overhead expense is possible by increasing the revenue.

For some time there has been an active and constantly growing demand for private rooms and especially for maternity accommodations, which at present we are unable to supply. We, therefore, also recommend for your consideration the building of a two-story fireproof brick pavilion, located on the brow of the hill, adjoining the surgical building, an unsurpassed location, commanding most extensive views of Quincy Bay and the approaches to Boston Harbor.

The plans of the pavilion show on the ground floor the X-ray department, with other available space; on the first floor, seventeen ward beds for women and ten private rooms, and on the second floor the maternity department of twenty-seven beds, including twenty-seven cribs, a total addition to our present equipment of 54 beds. The architects' estimated cost of this pavilion, based on a unit price of 54 cents per cubic foot, is \$203,250, including equipment and furnishings, ready for occupancy.

We estimate that the additional annual revenue from this pavilion, when filled to capacity, should approximate	\$50,000.00
Deductions:	
Additional payroll and supplies.....	\$15,000.00
Interest on bonds at $4\frac{1}{4}\%$	8,638.00
Insurance, repairs and depreciation on building	3,000.00
Allowance 25% for vacancies.....	12,500.00
	<hr/>
	39,138.00

Leaving balance for reduction of annual appropriation or retirement of Hos- pital Bonds	\$10,862.00
---	-------------

In closing we gratefully acknowledge, gentlemen, your hearty co-operation and that of the several departments of the city, the generous contributions and the active and sympathetic interest of the Hospital Aid Association, the Red Cross and other organizations of the city, and the many words of helpful suggestion and appreciation from our patients and citizens.

The financial statement of the operations of the past year, together with the report of the Superintendent, are annexed hereto.

HENRY M. FAXON, *Chairman*,

While each year brings new emphasis upon the absolute necessity of new buildings, if the hospital hopes to meet the needs of the community, the year of 1921 has brought many improvements in the equipment of several departments of the hospital.

Early in the summer Mr. Truman R. Temple, Librarian of the Quincy Public Library, arranged for books, including biography, travel and fiction, to be sent to the hospital and exchanged from time to time. This courtesy has been greatly appreciated by patients, school and faculty and we hope the arrangement may continue during the coming year.

The amount of sewing done by the women of the Hospital Aid Association, the church societies and clubs, has increased greatly during the year. The interest shown and the work done has been very much appreciated.

Many donations of flowers, books, magazines, fruit and jellies were received from time to time throughout the year and added to the comfort and pleasure of the patients.

Report of Training School for Nurses

During the past year the number of inquiries relative to the Training School has increased. The publicity given to nursing last year, combined perhaps with the general business depression, has directed the attention of more young women to the possibilities of nursing as a profession. Increased hospital facilities will of course make our Training School for Nurses more attractive and we will have less difficulty in securing pupils. By using extra ward maids for routine work we have continued with the eight hour schedule day and night.

Fifteen pupils were admitted for the preliminary course; two resigned who were unable to meet the educational requirements.

The graduating exercises were held June 14, 1921. The address was given by Mr. Jeffrey R. Brackett of Boston. The diplomas were presented to the graduating class by the Chairman of the Board of Managers. A reception followed the exercises. Music for the graduation and reception was provided by Mrs. Henry M. Faxon.

Class of 1921

Rose Bussing
 Pauletta Kristofferson
 Pearl Viola Buick
 Louise Cameron
 Margaret Florence Main

Ellen Louise Duggan
 Gladys Isabelle Irwin
 Bernice Alice Hobson
 Frances Howard Sampson

We were especially fortunate in having two scholarships provided by the Quincy Branch of the American Red Cross, enabling us to send two of our pupils, Ellen L. Duggan and Frances H. Sampson, members of the class of 1921, to The School of Public Health Nursing for the four months' course.

The School wishes to extend their appreciation to the members of the Hospital Aid Association for the many courtesies extended to them during the year, also to the friends who have contributed theatre and concert tickets, books and candy.

We also wish to acknowledge our indebtedness to the members of the staff who have assisted us in meeting the requirements of the Standard Curriculum. The course of lectures has been carried on throughout the year with an excellent spirit of co-operation.

The Hospital Aid Association continued the splendid work done in previous years. This year the Training School has been especially benefited, having received the school pins for the members of the graduating class, a victrola and many records, two theatre tickets each week during the school year, subscriptions for three magazines and dishes for afternoon tea service.

A check for thirty dollars received from the Wollaston Unitarian Society was used for additional books for the reference library, which now contains about sixty volumes.

The following lectures and demonstrations were given during the year:

Respectfully submitted,

KATHERINE E. HURLEY,
Superintendent.

REPORT OF THE HOSPITAL AID ASSOCIATION

January 1, 1922

Officers of The Hospital Aid Association:

President, Mrs. Charles L. Homer.

First Vice-President, Mrs. George E. Pfaffman.

Second Vice-President, Miss M. Gertrude Sampson.

Secretary, Mrs. Maurice P. Spillane.

Treasurer, Miss Mary L. Gavin.

The past year has been a very promising one for the Hospital Aid Association. New members, keenly interested in the hospital, have been added to our list of workers. Much sewing has been done at our regular meetings, surgical dressings made, and in so far as our funds would allow, we have given necessary equipment and books to the Nurses' Training School. A victrola was sent to them at Christmas time, together with a small fund to be used for student recreation.

This association has also offered a scholarship which will give to the nurse who wins it a supplementary course at Simmons College.

The Hospital Aid Association meets on the last Thursday of the month, except during the summer, at the Adams Academy Community Rooms and cordially invites any woman interested in the hospital to become a member.

MARY G. C. HOMER,
President.

REPORT OF THE TRUSTEES

To His Honor, the Mayor of the City of Quincy:

The Trustees of the Thomas Crane Public Library beg leave to submit their fifty-first annual report.

During the past year, in pursuance of our policy of trying to provide every section of the city with library facilities, we established a deposit station for books in Squantum, and we have arranged soon to open the new Manet Branch at Houghs Neck. We shall then have eight branches, where, three years ago, we had but two. The success of the South Quincy branch induced us to move it to more commodious quarters on Water street. The lease of the Wollaston branch expired during the Fall, and we were fortunate in being able to improve the opportunity by securing a better location at 675 Hancock street, just south of Beale street.

The great accomplishment of the year, however, has been the construction of the new and tasteful Parkway branch at West Quincy, at a cost of \$7,290. This was rendered possible by the Crane Memorial Fund, from which payment was made, both principal and income being available for the general purposes of the Library.

Shortly before the end of the year the Wollaston Women's Club organized a well-planned campaign to raise, by popular subscription, the sum of \$3,500, to purchase land on the northerly side of Beale street, nearly opposite the Masonic Building, to present to the Trustees as a site for a new branch building. The location is ideal and will make the Library accessible to a large population. Under such auspices the campaign was, of course, a success, and on January 17th, a deed of the land was delivered to the Trustees. Plans of the new building which had tentatively

been prepared, are now being completed, and, as soon as weather conditions permit, work will begin. The Crane Memorial Fund will be drawn upon to defray the cost, and, incidentally, a saving will be effected from the annual city appropriation of about \$1,000, now paid for rent.

The phenomenal and increasing circulation of the Library under our very capable Librarian, Mr. Temple, far surpasses that of many cities and towns having a much larger number of books. It is certainly an achievement of which we may well be proud to have seen the circulation of 167,000 in 1918, the year before he came to the Library, increase last year to 372,000. Lack of books alone prevented an even greater increase.

Respectfully submitted,

GEORGE W. ABELE, Chairman,
ELIZABETH H. ALDEN, Secretary.

REPORT OF LIBRARIAN

To the Trustees of the Thomas Crane Public Library:

I submit below the Librarian's report for the year ending December 31, 1921.

In common with public libraries throughout the country we have enjoyed an increased activity during the past year. The circulation of books which reached a total of 372,437, represents an increase of 123 per cent. during the past three years. In spite of the fact that seven branches have been required to reach the scattered portions of this city of less than fifty thousand residents we find that, disregarding fractions, we have circulated each of our books eight times; that we have loaned eight books to each inhabitant, and that we have done it at a cost to the city of eight cents per volume circulated. Libraries are few and far between that have done any one of these three things. I do not wish to appear self-complacent about what the library has accomplished. No one can be as sensible as I am myself of the many things that the library has failed to do. It is especially discouraging to try to develop reference work among a scattered population; and we have failed to do as much bibliographical work as we could wish. But, given the appropriation at our disposal and our unusual geographical problems, we have rendered the limit of possible service. We have come to the end of our expansion unless we can obtain more money for books. The fact that we have turned over each book in the library an average of eight times in spite of the unused books that have accumulated in our fifty years of existence, while the general average for libraries is probably less than four, is only another way of stating that we have not books enough to meet our needs. It would take considerable search to find a library that is circulating as many books that does

not have a collection from two to three times as large as our own. We are wearing out books at present faster than we are adding them. A constant chorus of complaint goes up from the borrowers served through the branches to the effect that their particular branch is neglected in the book purchases; and the shelves of many of them present an appearance suggesting that of trees denuded of their leaves in winter. Every effort is made to meet requests by a thrice a week exchange of books between the central building and the branches. But this comes far short of adequately meeting the situation. Unless we can supply these needs we must cease growing, just at a time when interest in our institution is obviously deepening.

The work with Miss Perry's Americanization classes has progressed along the lines laid down last year. Our methods of welcoming the various classes at the nearest branch and making them feel that the library belongs to them in a true sense has been commented upon by the State authorities in charge of Americanization work as "quite unique"; and it has met with their warm commendation on more than one occasion. The interest and enthusiasm developed at times becomes thrilling. Probably half of the classes become permanent borrowers. They are encouraged to read English books as far as possible but over 3,000 books in ten foreign languages have been loaned during the year.

Owing to the opening of new branches the work with four of the schools has been discontinued, leaving only four buildings to be served by deposits. It has been impossible to buy many new titles for these collections and the use of them has fallen off perceptibly. The work done in the library with the pupils from the Coddington school makes it a matter of regret that the other grade schools are not near enough to enable their pupils to enjoy the same instruction. It is also unfortunate that the High School pupils can no longer be spared from their study periods to make the visits to the library as in the past. These visits

have helped in no small measure to create the sense of being at home in the library that will be an asset in all later years.

Our staff has suffered many changes. Miss Kivioja and Miss Murphy left in May to be married. Our good wishes were mingled with regrets at the termination of several years of faithful service. Miss Hyland was married in June. We count it great good fortune that she has consented to continue her work as cataloger on half time. The last week in December, Miss Vickery left us, after a year's service, to accept a better paying position in the Newton Public Library. In the same week Miss Reed announced her decision to resign and take up library work among children in the Boston City Hospital. The work has long attracted her; and we can do no less than wish her success in the new field, at the same time being grateful for the five years of her signally useful service in the Children's Room. In spite of all these changes we have at no time been seriously embarrassed for help. Younger assistants trained in the library have been ready to take places as soon as vacated. One member of the staff has come to us from the outside during the year. Miss Isabelle King began work here in August as cataloger and general assistant. She graduated from the Pratt Institute School of Library Science in the class of 1921, after three years' experience in the library of her home town, Lake Forrest, Illinois.

We live in a city that shows itself eager for books. During the past two and one-half years we have enrolled as borrowers, 37 per cent. of the population. We have a well equipped central library building of unusual beauty. We have a loyal and harmonious staff. Before this is set in type we shall have the city covered with eight branches. We lack nothing for our ends but the one thing that primarily constitutes a good library—an adequate supply of books.

Respectfully submitted,

TRUMAN R. TEMPLE, *Librarian.*

At a meeting of the Board of Directors held January 3, 1922, the report of the Superintendent was accepted, adopted and ordered printed as the report of the Board.

REPORT OF THE SUPERINTENDENT OF WOODWARD INSTITUTE

Gentlemen: I herewith submit the annual report of Woodward Institute.

The work of the year has proceeded in a quiet, orderly manner without anything occurring to interrupt the general harmony and uniform progress. The feeling of unrest and the inability to return rapidly to stable conditions, which have been so noticeable everywhere, could not fail to be reflected in the young people, since they cannot be expected to display greater power of self control than do their elders. This instability of purpose and lack of application are gradually disappearing, and should soon give place to increased effort and greater ambition to improve the school work.

The enrollment of the school is a little larger than that of last year, notwithstanding the fact that an unusually large class was graduated in June. Without doubt the membership would be much larger, if conditions permitted us to follow the system in use in the public schools of the city, and admit a class in the middle of the year.

The teaching force remains the same as last year, with one exception. Miss Margaret F. Evans, a graduate of Wellesley College, has been appointed to the Mathematics position left vacant by the resignation of Miss Sally Steele last June.

Preparation for college has become a very serious problem in the high schools. Owing to the crowded condition of the colleges, only a limited number of the most promising and best prepared applicants can hope to be admitted. To take pupils from the grammar schools and prepare them in four years to pass the rigid college entrance examinations is practically impossible, except in the

case of a very brilliant pupil who is physically and mentally able, and also willing, to do the necessary work. Regular college preparatory schools either maintain a five, or even six, year course, or require one or more years in a high school as a condition of admission. It should be noted that the school year, nominally of forty weeks' duration, is reduced to barely thirty-seven weeks, after the numerous holidays and off days have been deducted.

Good teaching, of course, is essential in the class room, and fairness to the pupil requires that it be furnished him. It is equally true that the best of teaching alone does not produce the scholar. In our effort to make school life attractive to our pupils, we are in danger of placing too much emphasis upon the teaching of the lesson, and too little upon the mastery of it by the pupil himself. For the teacher to explain away all difficulties is admittedly more agreeable, both to teacher and class, but it does not promote the mental growth of the pupil; on the contrary, it tends to make him incapable of serious effort and initiative, and creates an inability to retain in memory the fundamental facts of a subject, without which progress is impossible. Interest in school work depends primarily upon a conscious ability to master its difficulties as they appear. To develop this feeling of power, to promote the desire to personally overcome the difficulties of a subject, to substitute the desire to work in place of a desire for amusement is the greatest service we can render to our pupils, since this is exactly what they will be obliged to do, if they hope for success after they leave school.

The cost of maintenance during the year has slightly exceeded that of last year, owing to the necessary increase in salaries that was made at the beginning of the year. In other respects conditions are a little more favorable than those of the last two or three years.

The annual prize given by the Alumnae Association for the best essay upon an assigned subject written by a

member of the senior class was awarded to Barbara M. McTear, of the class of 1921.

As a parting gift, the class of 1921 presented to the school a silver cup as a trophy to be competed for annually in the interclass basketball games.

Acknowledgment should also be made of the gift of a piano by Mrs. James Slade for use in the gymnasium to take the place of the old one long since past use.

Respectfully submitted,

HORACE W. RICE.

NOTES

1. The figure at the right of each study denotes the diploma points allowed for its successful completion. The figure in parentheses denotes the number of recitations per week when this differs from the number of diploma points.

2. Two foreign languages should not be begun at the same time. A foreign language to be beneficial should be studied at least two years.

3. Every pupil is required to take physical training unless excused upon the advice of a regular physician.

4. Place X opposite the course elected, also before each study elected.

5. A total of seventy-two points is required for a diploma.

6. Report cards are issued every eight weeks.

7. The daily session begins at a quarter past eight and closes at one o'clock.

8. A written request by parent or guardian is required for dismissal during the school session.

9. Parents are requested to co-operate with the school in requiring a definite amount of home study. No pupil can be expected to complete her work satisfactorily without home study.

DEPARTMENT OF ENGLISH

LITERATURE

The first two years of the course in literature are spent in reading carefully as many of the best English classics as the time will allow. There are three distinct aims in the course: (1) to teach the students to read intelligently and enjoyably; (2) to develop in them a taste for good litera-

ture; (3) to lay a broad foundation for the subsequent study and appreciation of the books selected for the third and fourth years. An outline history of English literature, supplemented by a study of the English poets, completes the four years' course.

GRAMMAR AND COMPOSITION

The course in grammar deals with the simple essentials of the English language; the parts of speech, the construction of sentences, and the laws of syntax. Grammatical accuracy is demanded in all work.

The work in composition is correlated with the course in literature—narration, description, exposition, and argumentation, each being taken in turn. The course is designed to aid pupils in expressing themselves clearly and logically in oral as well as in written form. They are urged to write from their own experience, to write often, and to acquire the habit of using simple, correct, idiomatic English. During the fourth year, formal argument is studied, together with preparation and practice in debating.

DEPARTMENT OF LATIN

- I. Latin Lessons.
Translation of prose selections.
- II. Cæsar—commentaries on Gallic War, books I-IV inclusive.
Sight reading.
Prose composition, based on Cæsar.
Grammar.
- III. Cicero—Orations against Catiline, The Manilian Law and Archias.
Sight reading.
Prose composition, based on Cicero.

- IV. Virgil, *Æneid*, books I-VI inclusive.
Sight reading from Ovid.
Prosody.
Prose composition reviewed, supplemented by college entrance examination papers.

DEPARTMENT OF MODERN LANGUAGES

FRENCH

- I. Pronunciation.
Grammar: Conjugation of regular verbs, and a few irregular verbs.
Simpler uses of tenses and moods.
Syntax.
Memorizing: Prose selections.
Reading: Lectures Faciles, *Le Français et Sa Patrie* or *La Tache du Petit Pierre*.
- II. Dictation.
Conversation.
Paraphrasing.
Composition.
Grammar: Continuation.
Conjugation of irregular verbs.
Uses of tenses and moods.
Reading: de Maistre's *Prisonniers du Caucase*.
Sandeau's *Mlle de la Seiglière*.
Daudet's *La Belle-Nivernaise*.
Le Gendre de M. Poirier.
Le Voyage de Monsieur Perrichon.
Memorizing: Poetry.
- III. Dictation.
Conversation.
Constant practice in translating into French.
Memorizing: Prose and Poetry.

- Grammar: Bruce's Grammaire Française.
 Review and continuation of difficult points, especially the subjunctive.
 Study of idioms.
- Reading: Molière's L'Avare.
 Corneille's Le Cid.
 Balzac's Eugénie Grandet.
 Hugo's La Chute.
- Prose Composition: François.

GERMAN

I. Pronunciation.

- Grammar: Declension.
 Conjugation of weak verbs and of the more usual strong verbs.
 Simpler uses of tenses and moods.
 Prepositions.
 Syntax.
- Memorizing: Vocabulary for oral and written work.
 Prose and poetry selections.
- Composition: Translation into German.
 Transposition.
- Reproduction.
 Dictation.
 Easy Conversation.
 Im Vaterland.
 Glück Auf.
 Storm's Immense.

- II. Grammar: Conjugation of strong and irregular verbs and modal auxiliaries.
 Order of words.
- Translation: Schiller's Der Neffe als Onkel.
 Arnold's Fritz auf Ferien.
 Gerstacker's Germelshausen.
 Hillerne's Höher als die Kirche.
 Wildenbruch's Das Edle Blut.
 Sight reading from easy texts.
- Memorizing: Poetry.

III. Prose Composition.

Grammar: Continuation of difficult points.

Conversation.

Memorizing of German Folk Songs.

Translation: Gerstacker's Irrfahrten.

Lessing's Minna von Barnhelm.

Schiller's William Tell.

Freytag's Die Journalisten.

Selected books for supplementary reading.

DEPARTMENT OF SCIENCE

I. Introducing to science—to teach the meaning of science as a whole and to develop a taste for science as a preparation for subsequent work by making it both useful and attractive. This is done by including in the course subjects of common interest like the following: How to read a meter; water supply systems; adulterants and simple methods for their detection; color in foods; headache preparations; removal of stains; the camera and photographic printing.

II. Biology. This is made to include the functions of all living things, both plant and animal, as they relate to man; movement, irritability, nutrition, respiration, excretion and reproduction.

Birds, reptiles and mammalia from the economic standpoint.

Health and disease from the standpoint of private and public hygiene.

Protective medicine and sanitation.

The relations of insects and animals to the spread of disease.

Man is the center of the course, and at the close all biological principles studied are applied to the human mechanism.

In the spring a small herbarium is made.

III. Chemistry.

DEPARTMENT OF MATHEMATICS

- I. Elementary Algebra.
- II. Plane Geometry,—demonstrations and original work.
- III. College reviews.

DEPARTMENT OF BUSINESS

FIRST YEAR

Commercial Arithmetic. A Review of fundamenal processes. Short methods and drill in business problems.

THIRD YEAR

Bookkeeping. Double and single entry.
Stenography. Principles of stenography.
Typewriting. Touch method.

FOURTH YEAR

Stenography. Practice in reading and writing shorthand.
Typewriting. Transcribing shorthand notes. Copying.
Duplicating.
Commercial Geography. A study of commercial and industrial conditions, products and countries.

DEPARTMENT OF PHYSICAL TRAINING

- I. Physical examination. Prescription and individual work, when necessary.
Class work: Free gymnastics, bar work, rings and clubs.
Games: Basket-ball, tennis and outdoor games, when the weather permits.
Simple dancing steps, including the polka and schottische steps. Folk dances.

- II. Physical examination and prescription work. Class work: Muscle free work as well as apparatus work, which includes bar, rings, wands, dumbbells and clubs.
Games: Basket-ball, tennis and outdoor games. Folk dancing and fancy steps.
- III. Physical examination and prescription work. Class work the same as that of the second year, but more advanced.
Games: Basket-ball and tennis.
Advanced folk dancing and fancy steps.
- IV. Physical examination and prescription work. Class work: Free work and apparatus work.
Games: Basket-ball and tennis.
Advanced folk dancing and æsthetic dancing.

DEPARTMENT OF HISTORY

- I. Ancient History. (a) A preliminary consideration of the origin and races of mankind—their primitive condition, migrations, and progress toward civilization.
(b) A brief study of the extinct civilization of the East.
(c) Greek history to the death of Alexander.
(d) Roman history from the founding of the city to 800 A.D.
- II. Mediæval and Modern History.
- III. American History, special attention being given to the forces which have shaped the Government of the United States and developed its present institutions.
Civil government of the United States.

DEPARTMENT OF MUSIC

The aim of the department of music is to cultivate a taste for good music and to prepare the pupils for intelligent and appreciative work in the further pursuit of the art in its various branches.

The vocal and choral study includes vocalization, sol-feggio, sight reading, dynamics, breath control, intonation, enunciation, unison and part singing.

The elementary theoretical work (required) aims to give the pupil a thorough foundation in the elements of music and includes rhythm, meter intervals, the derivation and construction of our present-day tonalities, major, all minor forms and chromatic scale in all keys, triads, chords of the dominant and diminished sevenths and cadences, leading to the study of

Harmony—elective, but strongly advised for all pupils in vocal or instrumental study.

Individual class work, one period weekly.

Vocal and choral work (entire school required), one period weekly.

DEPARTMENT OF ART

The study of art must necessarily be considered as a whole rather than the work of different classes; therefore, the course in drawing is arranged to meet the needs of the individual student and is varied to suit any requirements.

Pupils are not only fitted for continuing their studies in advanced schools, but also to appreciate the best in art.

The general plan is as follows:

Freehand drawing of objects in pencil, and pen and ink, and principles of perspective.

Study of form, light and shade.

Study of design, applied decoration.

Study of color in waters and in oil.

Modeling and casting.

Mechanical drawing.

REPORT OF SCHOOL COMMITTEE

REPORT OF SCHOOL COMMITTEE

To the Citizens of Quincy:

The annual report of your School Committee for the year 1921 is herewith submitted.

The time of writing this report brings to a close the first year of service of our Superintendent of Schools, Mr. Fred H. Nickerson. The prophecy in last year's report that he would maintain the high standards set for our schools and be among the leaders of broad and progressive educational methods has been fulfilled, and the City of Quincy is indeed fortunate to have secured his services.

It has been less difficult to secure and retain a competent teaching force than in the years of the war, but even with this lessened responsibility, the inadequate school accommodations and the increasing amount of work outside the school work have required a proportionately increased amount of time, strength and skill.

In spite of these adverse conditions the work of the schools in all its branches has been carried on most efficiently, and it is Mr. Nickerson to whom credit is due. In view of the increasing volume of work, which has come to stay, the Committee feels that the time is not far distant when a superintendent in Quincy will have to be relieved of some of the outside and routine work, and while maintaining an oversight, have help in organizing and carrying on the evening classes, the Continuation School, and perhaps other branches of the work which come under his jurisdiction, and so allow him more time to keep in touch with general educational methods and develop our own school system.

Mayor William A. Bradford, who also completes his first year as chairman of the Committee, has rendered valuable and intelligent service. While not forgetting the

proper interests of the City, he has always stood for the broader aspects of education and for giving to the children in our schools all that can be given to strengthen and train their minds and bodies.

It is with great satisfaction that the Committee reports gratifying progress on our new High School. Plans by Messrs. Cram and Ferguson have been approved, and we feel confident that the proposed building will not only fill the needs of our high school for some time, but will also be a real addition to the City, architecturally. The lot on Coddigington Street has been purchased, and the contract will soon be awarded. The new building will also house the administration department of our school system, and, incidentally, relieve the City from paying rent.

The lack of accommodations in our elementary schools is greatly to be deplored. The completion of the new High School and the use of the present High School building as a junior high will greatly relieve the situation, but every year brings its normal increase in the number of children of school age. Meanwhile portable buildings are being used and are proving satisfactory. These, however, provide only temporary relief, and should, of course, be replaced from time to time by permanent additions to present buildings, or by new buildings. A committee of two was appointed during the year to make a study with the Superintendent of the present and future school needs of the City, and to report a program for future school-building.

The Americanization work has been most ably and successfully carried on by Miss Perry who has recently completed her first year of service. This important work has grown rapidly as has also the number of evening classes, and the scope of the work has been broadened. A law recently passed allowed the Committee to place the health work of our schools in the hands of one physician and under the control of the School Department. This is felt to be a desirable change, as better results can be obtained from one person than where the responsibility is

greatly divided, while co-operation with the teachers and school nurses can be better maintained, if under one control, and will result in improved and more efficient service in this important work.

In spite of temporary handicaps our schools are in excellent condition, and the Committee assures its continued interest and best efforts to help maintain them at the desired standard.

The foregoing report, presented by a special committee consisting of Mrs. Alice M. Arnold and Mr. George W. Abele, was adopted as the Annual Report of the School Committee of 1921.

FRED H. NICKERSON,
Secretary.

REPORT OF THE SUPERINTENDENT OF SCHOOLS

To the School Committee of Quincy:

I submit herewith my first annual report as Superintendent of Schools in Quincy.

At the beginning of this report I desire to express my admiration for the efficient system of organization developed in the Quincy schools by my predecessor, Mr. Barbour. In my judgment, Quincy is to be congratulated upon having had the benefit of his service for the eleven years that he acted as its Superintendent of Schools.

During the year that I have had the honor to act as your Superintendent, I have suggested relatively few changes in the policies previously in force, preferring first to familiarize myself thoroughly with existing conditions and needs in the schools.

It is inevitable, however, that, from time to time, I shall advocate some changes in and additions to the policies that have been in force heretofore, (1) because any man worthy to hold the position of Superintendent of Schools necessarily has his own ideas as to the most effective policies to be adopted in the administration of his trust, and (2) because, as the conditions of social existence change and new community needs develop, the ideas and ideals with respect to the organization, administration and scope of instruction in our public schools must change correspondingly, if those schools are to fulfil their mission in preparing young people to become effective social units.

CHANGES DURING THE YEAR

The following are the principal changes made during the past year:

1. A uniform requirement has been adopted for granting diplomas to pupils at the end of the elementary school course.

No common standard of attainment had been set, previously, as an absolute requirement for a diploma from these grades, the Masters of the several schools recommending for that honor such as seemed to them individually worthy.

Discussion of this practice with the Masters led to the unanimous decision that it was desirable to adopt a uniform standard by which to measure the fitness of children to receive diplomas. This decision was approved by the Committee and the plan now in force is to grant diplomas at the end of the elementary course only to those pupils who have maintained at least a "passing" mark in every subject taken in the eighth or final year of the elementary schools.

It is believed that this practice will tend to improve the scholarship of pupils in the elementary schools.

2. Another change closely related to the preceding has been approved by the Committee. Heretofore, a diploma of graduation from the elementary grades did not necessarily admit the holder to the High School,—only those graduates certified by the Master as fit being admitted thereto. Those not thus certified had the alternative either to drop out of school or to attend the Industrial School, if a boy, or the Home Making School, if a girl.

One effect of this practice was to injure the best development both of the Industrial School and of the Home Making School, because it tended inevitably to develop in the public mind the idea that these schools were designed for the intellectually unfit, and, therefore, in some cases, to keep from these schools pupils whose welfare would be promoted better there than at the High School.

Under the new plan, the possession of a diploma from the elementary schools entitles one, without further certifi-

cation, to enter the High School, as well as the Industrial School or the Home Making School.

This change has been made, (1) because it is believed that it will tend to place the Industrial School and the Home Making School on a higher plane in the estimation of the public and thereby enable them to do a larger service than heretofore, and (2) because, if it is just to tax all the people to maintain a High School, it is also just that one who has been granted a diploma of graduation from the elementary schools should be given an opportunity to continue his educational development in the next higher grade in the High School, if he so desires. To my mind, any plan of administration which operates to prevent pupils from so doing is undemocratic.

3. Another change made during the year is in the plan of promotions from grade to grade in the elementary schools. Previously, such promotions have been made upon the judgment of the individual teachers with the approval of the Masters without reference to any uniform standard of rating.

It seemed to the Masters as well as to myself that justice to the children, as a whole, would be more nearly attained and that the effect upon the scholarship in the schools would be beneficial, if some common standard of rating were given teachers as a basis for promotions. Accordingly, promotions, hereafter, are to be made upon the following basis: (1) pupils who get a rating of at least 3 on our scale of marking in all their studies will be promoted unconditionally; (2) pupils whose rating averages at least 3 and who do not fall below 3 in more than one of the so-called major studies, viz., Language, Arithmetic, History, and Geography, will be promoted conditionally, i.e., they will be given a trial in the next higher grade, with the understanding that they shall be continued therein if their work is satisfactory; (3) pupils who fail to gain an average of at least 3, or who fall below 3 in two or more of the so-called major subjects, will not be promoted.

It is hoped that the application of the foregoing standards may stimulate pupils to greater earnestness in their school tasks.

4. Another change made during the past year has to do with the age of admission to Grade 1B.

Previously, only those children were admitted to this grade who were six years old at the beginning of the semesters in September and February, or should become of that age within one month thereafter. Hereafter, in accordance with the plan approved by the Committee, any child who may become six years old by November 15 (the midway point of the first semester) will be admitted in September if the parents so desire, and, similarly, one who may become six years old by April 15 (the midway point of the second semester) will be admitted in February.

5. Another change is the beginning of the policy of putting first year pupils in the elementary schools on a longer school day.

For some years, it had been the practice in the schools of Quincy for pupils to attend only a half-day throughout the first year of their school life. Whether this practice was adopted originally for educational reasons or because the schools were overcrowded, I do not know.

Consultation with the supervisor of the primary grades and with the Masters of the elementary schools, confirmed my own conviction, (1) that, as a result of half-day attendance during the first year, pupils were being inadequately prepared for the work of the succeeding grades, and (2) that, from the viewpoint of physical well-being, there was no reason to fear that children who were six years old would suffer from a longer school day.

Moreover, it was ascertained that many parents, at least, desired a longer school day for their children during the first year. Therefore, with the approval of the Committee, a two-session day for the first year pupils was put into effect at the opening of the school year in September.

1921, in all schools where conditions permitted. The hours of attendance are from 9 to 11.30 A. M., and from 1.30 to 3.30 P. M.

Owing to lack of available rooms, first year pupils in a few schools still have the single session. It is expected that conditions will make it possible at the opening of the second semester on January 30, 1922, to add two more schools—the Atherton Hough and the Cranch—to the list of those offering the opportunity of a two-session day to first year pupils.

6. Another forward step during the past year is the more searching examination of pupils for possible physical defects that may interfere with their best development. The beginning of work in this line was made early in the present school year and thus far has been confined to second year pupils.

As rapidly as conditions permit, this work will be extended to the pupils of the other grades. Before the examinations were begun, the following communication was sent to the homes:

QUINCY SCHOOL DEPARTMENT

Hygiene Division

Chap. 502, Sec. 5, Acts of 1906: "The School Committee of every city and town shall cause every child in the public schools to be separately and carefully tested and examined at least once in every school year to ascertain whether he is suffering from defective sight or hearing or from any other disability or defect tending to prevent his receiving the full benefit of his school work, or requiring a modification of the school work, in order to prevent injury to the child or to secure the best educational results. . . . The committee shall cause notice of any physical defect or disability requiring treatment to be sent to the parent or guardian of the child. . . ."

In accordance with the above Act it is planned, with your approval, to make an examination of your child at the

.....School on
.....

This examination will be made *privately* by the School Physician and School Nurse, and will include Heart, Lungs, and Defects of

Posture. You are cordially invited to be present at the examination.

If you prefer to have your Family Physician make the necessary examination, a record blank will be sent you.

Please sign the accompanying card in the proper place to indicate your desire in this matter and return the same to the teacher of your child.

FRED H. NICKERSON,
Superintendent of Schools.

The following card accompanied this communication:

QUINCY SCHOOL DEPARTMENT
Hygiene Division

I am satisfied to have my child given the necessary physical examination by the School Physician.

Signed.....
(Parent or Guardian)

I prefer to have my child examined by our Family Physician.

Signed.....
(Parent or Guardian)

Date.....192.....

Parents, as a whole, have co-operated splendidly in this work, apparently feeling that it is a step forward in the fine work that our school nurses have been doing for the physical well-being of the school children.

7. Another new undertaking of the year was the maintenance of a summer school for the benefit of pupils who for one reason or another were not up to grade in their work. The school opened on July 5 and continued for six weeks. Sessions were held on five forenoons of each week from 8.30 to 11.50 o'clock. Pupils from grades VB to VIIIA inclusive were eligible and attendance was voluntary. Three types of pupils were admitted: (1) those who had failed of promotion in June and, in the judgment of their teachers, might, during the summer session, reasonably hope to make up their deficiency so far as to be advanced to the next higher grade in September; (2) those who had been promoted with conditions in June and desired to remove their deficiencies so as to be better quali-

fied to do satisfactory work in the advance grade; and (3) pupils who had been regularly promoted in June but felt the need of additional instruction in subjects in which they were relatively weak.

Three centers of work were established,—one at the Willard School, one at the Francis W. Parker School, and one at the Daniel Webster School. Five teachers were assigned to each center. All of the teachers were chosen from the regular corps and were selected for special fitness for the kind of work to be done. One teacher at each center was designated to have charge of the administration of that center,—the Superintendent of Schools acting as general director of all.

The total number of pupils enrolled at the combined centers was 391; the average membership, 334.84; the average attendance, 310.10; and the per cent. of attendance 92.61.

Of the number enrolled, 217 were seeking to gain a lost promotion; 120 were seeking to remove handicapping conditions under which they had been promoted; and 54 were seeking to strengthen themselves for the work of the coming year by reviewing phases of work in which they had been passed but in which they felt the need of additional instruction and drill.

Of the 217 who were striving to gain a lost promotion, 169, or 78 per cent., succeeded; of the 120 who were working to remove conditions, 96, or 80 per cent., succeeded; and, of the 54 who were reviewing to gain a better understanding of subject matter in which they had previously "passed," 45, or 83 per cent., made distinct gain. In other words, of the 391 pupils enrolled, 310, or nearly 80 per cent., were entirely successful in accomplishing the purpose of their attendance, while 81, or practically 20 per cent., although they did not fully accomplish their purpose, nevertheless, benefited educationally to a greater or less degree from their attendance.

The cost per pupil for the maintenance of the school,

based upon the average membership, was approximately \$4.56.

The general attitude of the pupils toward the school is indicated by the following statements from a report of one of the head teachers: "One pupil remarked that he had done more problems in three weeks than in his whole life before; another expressed the wish that he might 'go to summer school all winter'; another, who arrived at 9.30 one morning, replied, when questioned regarding his tardiness, 'Well, you see it was raining and my mother did not want me to come because we had no umbrella, but I went to everyone's house near us until I could borrow an umbrella and that made me late.'"

The feeling of the teachers is suggested by the following statements from the report mentioned: "The spirit of the school was delightful. After the first week, we found pupils already assembled when we arrived at 8.05, working on lessons which had been assigned previously. Although the weather was trying, pupils worked untiringly. In the six weeks there was no case of discipline and teachers and pupils closed with the happiest recollections of their work."

While a summer school as part of public school activity is new in Quincy, it is in no sense an experiment in public school practice in general. For some years such schools have been held in many progressive towns and cities, and, in nearly every community where tried, they have become a regular feature of the school system. The extension of the summer school idea is due to the belief of thoughtful educators, (1) that the child who must pass the greater part of the long summer vacation amid city conditions is better off physically, mentally, and morally to be engaged during part of that period in directed educative work than he is to be left largely to the unsupervised activities of the street; (2) that the public school system is the logical agency to provide such educative work, and (3) that to close public school plants entirely during the long summer session, when they might be utilized to the edu-

cational advantage of young people, is not an economical procedure from the point of view, either of dollars and cents, or of the highest good of democratic society.

From my observation of the results secured during the past season in our summer school, as well as from previous experience in the management of such schools, I am convinced that the summer school should be a permanent feature of Quincy's public school system.

COMMENT ON STATISTICAL MATTER

Such statistical tables as it has seemed necessary to prepare for reference from year to year may be found in Appendix B of this report.

Comparison of the statistics in Table V, Appendix B, with similar figures for the preceding year shows the following significant facts:

1. The regularity of attendance of pupils for the system as a whole for the school year ending with June, 1921, was 94.1 per cent. This is 1.2 per cent. higher than for the preceding year, and 2.5 per cent. higher than the average for the State at large according to the latest report of the State Department of Education.

Inasmuch as regularity of attendance is an important factor in determining the character of school results, this relatively high per cent. of attendance for our schools during the past year is gratifying.

2. The average membership of the regular day schools for the school year ending with June, 1921, viz., 8,493, is 408, or 5.4+ per cent. more than that for the previous year. This increase of 408 pupils during the past year is sufficient to fill a ten-room building with forty pupils to a room. A study of average memberships for the seven preceding years shows an average increase of 312 pupils yearly. These figures suggest the necessity of a steady and generous building program by the City to keep pace with the annual growth in school membership.

3. Studying the Table previously indicated with spe-

cial reference to the growth in attendance at the High School, it appears that the average membership of that school increased 143, or 12.5 per cent. during the past year. It is interesting to note that, during the same period, the average membership of the elementary grades, i.e., those below the High School, increased 265, or 3.8 per cent. In other words, in spite of the congested conditions at the High School, which tended to turn away some who otherwise would have gone there, the rate of increase in the membership of that school during the past year is over three times that for the elementary grades. In view of the foregoing showing and of the further fact that, for the seven years immediately preceding the past year, the average rate of increase annually in the High School membership is 1.4 per cent. higher than that for the elementary grades, it is obvious that the suggestion that one occasionally hears to the effect that the High School is not growing as rapidly as it should is without foundation in fact.

4. Another significant fact appears from comparison of the figures in Table V with similar figures for previous years, viz., that the ratio of high school membership to the total school membership for the past school year is larger than for any one of the seven preceding years. This ratio for the past year is 15 per cent. The nearest approach to that during the seven preceding years is 14.2 per cent. in 1917. In this connection, it is interesting to note that by figures given in the latest published report of the State Department of Education covering the school year ending June, 1920, the average ratio of high school membership to the total school membership for the 37 other cities of the Commonwealth is 14.2 per cent.—a figure slightly less than that for Quincy.

It appears, therefore, that, so far as this ratio may be taken as indicative of the efficiency of a school system, Quincy stands well in comparison with the other cities of the State.

5. Comparison of Table IX, Appendix B, with simi-

lar statistics for the preceding year, shows a remarkable increase in the attendance upon the industrial evening classes. The enrollment in these classes for the past two years is as follows: 310 during the year ending with June, 1920, and 650 for the year ending with June, 1921, an increase of 109.6+ per cent. during the past year. This increase has been principally in the Practical Arts classes for women,—the classes for men showing an increase of only two members. The rapid growth in this phase of work demonstrates that it meets a practical want of the community.

THE ORGANIZATION OF THE SCHOOLS AND THE SCOPE OF WORK UNDERTAKEN

Convinced by repeated experiences that the public at large has a very inadequate conception of the scope of the work undertaken in the schools, and of their organization, it has seemed best to bring together in a brief statement the essential facts along this line for the benefit of our citizens. Those facts are as follows:

1. *Kinds of Schools.*

The following types of schools are maintained:

(1) The regular *Academic Schools*, consisting of one high school which offers four years of training in any one of six different courses of study organized to meet the various needs of pupils who have completed the elementary school course, and of seventeen elementary schools which offer an eight-year course to all children who have reached the age of six years.

(2) The *Pre-Vocational School*, which offers special opportunity, largely in manual work and domestic science, to pupils who have completed the seventh year in the regular elementary schools and seem to need a modified program for their eighth year.

(3) The *Independent Industrial School*, for young men

between 14 and 25 years of age who are preparing for work in the trades. This school is supported in part by the State, and, as now organized, provides training in cabinet making, electrical work, machine shop work, sheet metal work, and plumbing.

(4) The *Home Making School*, for girls who have completed the elementary school course, and desire, in addition to a certain amount of work in the major subjects of the academic course, training of a specialized character in cooking, sewing, millinery, dressmaking, home nursing, and the general theory and practice of homemaking.

(5) The *Continuation School*, for boys and girls between the ages of 14 and 16 years who have left the regular schools to work and are obliged by law, if working, to attend the school for at least four hours per week, or, if not working, to attend a minimum of twenty hours per week. This school, like the preceding, is State-aided.

(6) The *Evening Industrial School*, for men in the industries who desire further training in their special fields of work.

(7) The *Evening Practical Arts* classes, for women who desire special instruction in millinery, dressmaking, cooking, nursing, etc. Classes for these purposes are formed throughout the City, wherever a sufficiently large group desire the work. The work done in these classes as well as that in the Evening Industrial School for men is supported in part by the State.

(8) The *Academic Evening School*, for young people who are not attending any of the day schools and desire further instruction in academic subjects.

(9) The *Americanization Classes*, for the purpose of preparing our foreign-born population for efficient American citizenship. This work is also State-aided.

(10) The *Academic Summer School*, for pupils of the regular schools who for one reason or another require spe-

cial aid beyond what they have received during the regular school year, in order that they may secure satisfactory preparation for advance work and avoid the necessity of repeating a grade. The importance and success of this school is discussed in another part of this report.

2. Division of Health Work.

The health work done in the schools is without question one of the most valuable phases of school endeavor. It is accomplished (1) through careful medical inspection and systematic instruction under the direction of three trained school nurses and a school physician, (2) through regular physical training exercises in all the schools directed by specially trained instructors, and (3) through the maintenance of two dental clinics, to stimulate proper care of the teeth, and to provide opportunity for pupils to have dental treatments at a nominal expense, provided parents so desire. That these clinics meet a need of the community is indicated by the fact that, as shown by the Report on Dental Clinic Work in Appendix A of this report, 5,468 patients were registered and 10,190 operations were performed during 1921.

3. Employees of the Department.

For the administration of the various activities of the Department a force of 356 workers is required, viz., a superintendent, 10 supervisors and special teachers, 13 head masters and principals, 296 teachers, 5 clerks, 1 attendance officer, 1 school physician, 3 nurses, 2 dentists, 2 dental assistants, 1 chief janitor, and 21 janitors.

THE COST OF THE SCHOOLS

From time to time one hears the idea advanced that our schools are managed extravagantly. One of the most marked suggestions to that effect appeared in the "Quincy Merchants' Bulletin" of October 19, 1921, under the cap-

tion, "Apply the Brakes to City Expenditures." The following are some of the statements therein:

1. "No school board has any right to demand more education for pupils than the income of the City warrants. They have no moral right to run the City into debt just because they think this thing or that thing essential. They have added course after course of study which is all right for a wealthy municipality, but which is not right for a poor municipality like Quincy."

2. "The school board 20 or 30 years ago did not think it necessary to have singing, harmony, drawing, cooking, dressmaking, millinery, art of homemaking, bookkeeping, typewriting, commercial geography, Spanish, German, etc., etc. These things cost money—money that a poor municipality cannot afford."

3. "Our cost for school education is all out of proportion. The school appropriation ought to be cut down at least \$100,000 per annum."

Regarding statements 1 and 2, it may be said, (1) that school committees do not, as is suggested, arbitrarily formulate courses of study for our public schools, but that, practically every subject in our modern school curriculum is there either because its inclusion is mandatory by law, or because experience has proved that parents desire it in sufficiently large number to warrant its inclusion; (2) that the mission of our public schools is to prepare young people to become efficient members of the social organization of their day, and that, since social conditions today are more complex than formerly and are certain to become still more complex when the boys and girls who are now in the schools come to play their parts as men and women of tomorrow, it follows that the present-day school curriculum must, necessarily, be more comprehensive than that of past generations; and (3) that, even if it were legally permissible and educationally wise to eliminate from the school curriculum, as the writer of the above-mentioned article suggests, singing, cooking, dressmaking, millinery,

art of homemaking, bookkeeping, typewriting, commercial geography, Spanish, German, and much more that he hints at in his "etc., etc., etc.," one of two results would inevitably follow, either a considerable number of pupils would drop out of school because they failed to find there what they desired, or, if they remained, would simply take up other studies which were kept in the curriculum. If the latter were the result, no appreciable financial saving would be effected since no material reduction could be made in sittings to be provided, in books and supplies to be furnished, or in the number of teachers required for instruction.

If, on the other hand, the former condition should result, viz., that pupils dropped out because the schools failed to provide the studies they desired, a financial saving in school support might be made, but it would be accomplished by the application of a principle that is viciously undemocratic, i.e., by denying to those less fortunate in a financial way the right to develop at public expense God-given talents whose development, not only would fit them better for opportunities to which they aspire, but also would add something to the sum of public well-being. If one's thinking on policies relative to public education is to be sound, it is necessary for him to keep in mind that the public schools are maintained, not for any one class of people, but to promote the interests of society as a whole by equalizing, so far as possible, educational opportunities for all the children of all the people; and, in my judgment, one who advocates the saving of the public's money by a policy that will tend to drive children from the schools sooner than they need to go has yet much to learn with respect to the fundamental principles upon which our great system of public schools rests.

With respect to the third statement from the above-mentioned article to the effect that an annual saving of \$100,000 could and should be made in Quincy's school expenditure, it may be said that without doubt that amount might be cut from the cost of our schools, provided the

citizens desire to pay the price of such an attempt at economy. That price is inevitably inferior educational opportunities for the boys and girls of Quincy as compared with those offered in other communities of good standing. Now, when it becomes known that Quincy is providing an inferior brand of public education, the type of men and women that will be most helpful in upbuilding the best interests of the city will not seek Quincy as a home in which to rear their children. As a result, property values and rental rates will decline, so that, in the end, property holders in the City will lose more thereby than it would cost them to contribute their percentage of the amount necessary to support first-class schools. Simply from an economic point of view, it would seem poor policy for a community to reduce the school expenditure to a point that will result in inferior schools.

Now, since it is unreasonable for any community to expect to keep the standard of its school product permanently up to that of other similar communities by an expenditure smaller than they require, it may be profitable, in this connection, to consider briefly how the annual expenditure for school support in Quincy compares with that in the other cities of the Commonwealth. The figures available for such comparison are those in the latest published report of the State Department of Education for the year ending June, 1920.

These figures show that the average expenditure for school support for each pupil based on the average membership of all the schools was \$58.33 for the other 37 cities of the State and \$45.38 for Quincy. In other words, Quincy spent \$12.95 less per pupil for support of its schools than the average for the other 37 cities, there being only five that spent less, viz., Waltham, Everett, Newburyport, Chelsea and Woburn. A little further mathematical calculation shows that, if Quincy had expended for school support as much per pupil as the average for the other 37 cities of the Commonwealth, it would have cost the City for the year \$101,307.85 more than it did.

These facts indicate the absurdity of the suggestion, previously noted, that Quincy's school appropriation "could and should be reduced \$100,000 per year." Such utterance may be sincere, but, if so, one who makes it has little conception, it seems to me, either of what is wise educationally for the City, or of the facts with respect to educational costs in general.

THE HIGH SCHOOL

The overcrowded condition of this school and the great need for enlarged accommodations have been so thoroughly set forth during the past year that it seems unnecessary at this time to discuss the situation further, especially since the contract for a new high school building has recently been awarded.

For details with respect to the conditions at this school, I am submitting herewith the head master's report. Preliminary to that report, however, I want to consider briefly a criticism that has been given some publicity to the effect that the Quincy High School fails to fit pupils properly for entrance to college.

With respect to this criticism, it may be said, (1) that in every community of which I know there are those who criticise their local high school similarly, i.e., the disease is common; (2) that the Quincy High School is able to fit and does fit pupils for any college which they may desire to enter; (3) that it does this work well in the case of pupils who are physically and mentally able to perform the work required for college preparation, provided they do not unduly dissipate their time and energy in social affairs; (4) that in common with the Quincy High School, every school which undertakes to prepare pupils for college has its failures. The important thing to determine in passing judgment upon a school in this respect is whether or not its per cent. of failures is relatively large compared with similar institutions.

It is interesting and significant to note the following facts in this line, with respect to the Quincy High School for the past few years:

The latest report of the College Entrance Examination Board, viz., that for 1920, shows that, out of nearly 50,000 ordinary examinations taken in that year for college entrance, 40.8 per cent. were failures. Now, in the examinations taken during the same year by Quincy High School pupils, only 24 per cent. were failures. In similar examinations in 1919, the failures for the country at large were 49.8 per cent., and in Quincy, 31 per cent.; in 1918, for the country at large 44.6 per cent., and for Quincy, 11.6 per cent.

These figures show that, instead of doing poor work in preparing pupils for college, as has been suggested, the Quincy High School is doing its work in this line well as compared with that of similar institutions for the country at large.

In this connection, it may be well to note that, inasmuch as the majority of pupils in our public high schools are not headed for college, the preparation of pupils for college cannot, in fairness, be considered the most important function of a high school nor the chief criterion of its efficiency. In 1917, the United States Bureau of Education issued a Bulletin entitled "The Reorganization of English in Secondary Schools." In that report, appears the following statement: "The college preparatory function of the high school is a *minor* one. Most of the graduates of the high school go, not into a higher institution, but into life."

In order that I may not be misunderstood on this point, I desire to add, (1) that, while I believe as I have indicated in the foregoing statements, I believe, also, that our high schools must furnish adequate opportunity for young people to prepare thoroughly for college and other higher institutions of learning, and (2) that, while I propose to do what I can to see that our local school performs its full duty in this direction, I shall endeavor, also, to see that it does equally well its larger task of training for social efficiency in the everyday work of life that larger percent-

age of its membership whose school days end either in or with the completion of the high school period.

The following is the report of the head master of the High School:

MR. F. H. NICKERSON,

Superintendent of Schools:

I take pleasure in submitting herewith my tenth annual report as Head Master of the Quincy High School. It may be of interest to consider statistics covering ten years in order to study the growth of the school. Therefore, I include numbers for my first year, the past year and the present year, taken in December of each year.

	1912	1920	1921
Whole number enrolled	874	1224	1425
Whole number at date	790	1190	1389

In February, 1922, about 250 will be added to the above numbers. Thus it will be seen that the school has practically doubled its membership in ten years. It should also be noted that in February the capacity of the building will be reached, so far as rooms for classes are concerned, both in the morning session and in the afternoon session. If the membership hereafter can be maintained at about the same number by means of graduation we can expect to worry along as at present until a new building can be completed. If, however, next year brings any such increase as has the present year, the condition will become hopeless and some boys and girls must be deprived of a part at least of their high school education. It can be readily seen that this would not reflect credit on a city famed for its educational facilities.

I do not remember to have discussed the subject of admission to college in any previous report and the present

offers a favorable opportunity for going into this subject in some detail since there seems to be considerable misunderstanding regarding this important part of the work of our school. In general, there are only two methods of securing admission to college: by presenting a certificate from the principal of a preparatory school or by passing examinations in certain specified subjects or groups of subjects. No State Normal School or college, except in special departments, accepts a candidate on the strength of his diploma from high school alone. The higher institution expects that the candidate shall have shown a higher degree of excellence than is required just for a diploma and, moreover, expects that a program of studies shall have been followed which in its judgment will best fit the candidate for the work of that particular institution. Accordingly, those colleges and schools which admit by certificate require the personal statement of the principal of the preparatory school that the above requirements are met in the case of the prospective candidate. The principal, to satisfy himself of the superior ability of the candidate, requires him to attain a high rank, in our own school a grade of "good," and also requires him to be examined within the school under conditions approximating those of regular college examinations in order to still further test his ability in the required subjects. It should be understood that the higher institution holds the principal and the preparatory school strictly to account for the ability of those entering from the preparatory school to do the work of the higher institution, and that serious failure on the part of any entrants lays the school liable to loss of its privileges of sending pupils to higher institutions by certificate. The principal and teachers, therefore, are bound, for the good of all concerned, to be thoroughly satisfied that the pupil receiving a certificate to a higher institution is capable of doing the work of that institution. In passing, it may be well to state that all colleges which accept certificates will accept the certificate of the principal of the Quincy High School.

The question of examinations is the most serious phase of this subject at the present time because most of the larger institutions admit only by examination. For the most part, the examinations taken are those set by the College Entrance Examination Board, which is a sort of clearing house for entrance examinations for most colleges. A few colleges give their own examinations, but these mostly also admit by certificate so they need no discussion here. The examinations of the Board lack uniformity and some of them are very difficult. They are a very severe test of the ability of the candidates and also of their powers of endurance, so much so, that the number of failures each year is large, in some subjects amounting to more than half of all who take examinations in those subjects. So serious has become the situation that it is the subject of constant and earnest discussion among teachers in preparatory schools and even within the colleges themselves.

The actual conditions are that the colleges are besieged with numbers clamoring for admission and for whom they have only limited accommodations. In selecting candidates for admission, they feel that they are entitled to pick only those of superior mental ability which means mostly, of course, those able to pass the searching examinations. The colleges are rather frank in their statements along this line. One very prominent college has definitely adopted a new selective method of admission in which it proposes to look over all applicants and pick a few of the best. This latter college, however, does not require examinations, but will admit by certificate.

The growing difficulty in gaining admission to college has put a great burden on preparatory schools, particularly public high schools. The fact that the requirements for college have been increasing steadily both in quantity and quality while the time given to preparation has remained the same would of itself account for some of the difficulty. Then our comprehensive high schools must provide education for all the young people who come to them and of

these only a small number intend or are qualified to enter higher institutions. The schools can give to these latter only their share of time and effort and in many instances this is not enough to gain them admission to college. I may go so far as to say that the public high school in general is having difficulty in preparing for college any boys and girls, except those of high mental ability, in the four years now usually given to such preparation. The time has possibly arrived when the pupil of average ability who hopes to enter college must expect to spend more than four years in preparation. This is already required in private preparatory schools. Our young people would probably find themselves more successful in entering college and more happy during their preparation if they were to give at least five years to it and soon it may be necessary to make this a requirement for all expecting to enter college.

My purpose in dwelling at length on this subject in my report is to attempt to explain the situation to such of our citizens as may read the report. So far as our own school is concerned, we have had the same difficulties as other high schools and we have had the same degree of success. If success is to be measured by the standing of our graduates in college rather than by the number who entered college, then our school has attained a very high degree of success, as is evidenced by the records in college of our graduates for several years. The conclusion of the whole matter is that the colleges have room for only a part of the young people who desire admission and are accepting only those who are of superior mental ability and are fully prepared to do the work of the higher institutions. Boys and girls of average ability, to obtain admission, must expect to sacrifice every outside interest and devote themselves wholly to intensive preparation or must expect to spend one or more years beyond the time now considered enough for such preparation.

There has not been space in this report to discuss the various other activities of the school. I may say that, in

spite of all the handicaps, the work of the school has been maintained as in previous years and without any lessening of interest or efficiency, I trust, except such as is inevitable from the most discouraging conditions under which we are compelled to work. In closing this report we should not be unmindful of the help and support we have had from the School Committee and yourself.

Respectfully submitted,

ERNEST L. COLLINS.

THRIFT TRAINING

The fundamental purpose for which public schools are maintained is to increase social efficiency. Inasmuch as a habit of thrift on the part of citizens generally is an important factor to that end, it is a duty of the public schools to develop this habit in pupils so far as possible.

Discussing the value of the thrift teaching in the schools, a leading Boston newspaper in its editorial column says: "The importance of this idea is unquestionably great. Thrift and economy must be practised vigorously and systematically if headway is to be made against the rising tide of extravagance and exorbitance." A Bulletin issued by the United States Bureau of Education in 1914 contains the following statement with respect to school savings systems: "It is of great economic value to a nation to have frugal people, and, if for no other reason than that of national well-being, practical thrift should be taught in the schools."

Impressed with the necessity for this work in the schools, the legislators of Massachusetts in 1910 passed a law "to provide for compulsory instruction in thrift in the public schools" of the Commonwealth.

That the school system of Quincy is performing its duty well in this respect is indicated by the facts (1) that a savings system is in operation in all of our elementary schools, and (2) that, as a result of this work, 3,534 different pupils were

depositors in the system during the past school year and their total deposits amounted to \$19,582.77. Only \$1,918.49 of this amount was withdrawn during the year, so that the net amount to the credit of the depositors as the result of the year's effort is \$17,664.28. Since October 1, 1908, when the work was begun in our schools, the children have deposited \$124,325.53.

Other interesting facts in this line may be found by a study of Table XI in Appendix B of this report.

CONCLUSION

Much more than has been written might easily be said regarding the work of the schools during the year; but enough has been presented, I think, to give the local public, for whose benefit it is chiefly made, a fair understanding of the purpose in accordance with which the schools are being administered, of the organization and cost required in their maintenance, and the results secured in them.

In closing, I desire to express my appreciation (1) of the freedom given me by the committee in working out policies that have been approved, and of the consideration given such proposals for changes as it has seemed to me wise to make; (2) of the loyal and efficient service of my fellow-workers in every department of the school system; and (3) of the co-operative spirit of the citizens in general as I have come in contact with them.

It is a pleasure to work under such conditions.

Respectfully submitted,

FRED H. NICKERSON,
Superintendent of Schools.

APPENDIX A

SPECIAL REPORTS

I. INDUSTRIAL SCHOOL

MR. FRED H. NICKERSON,
Superintendent of Schools,
Quincy, Massachusetts.

My dear Mr. Nickerson:

I herewith submit the tenth annual report of the Quincy Industrial School.

We have had enrolled during the year one hundred and forty-two pupils distributed as follows:

Woodworking Department	35
Machine Department	38
Electrical Department	30
Plumbing Department	21
Sheet Metal Department	18
<hr/>	
Total	142

Our average enrollment was 98.9, our average attendance 88.6, and per cent. of attendance 89.6.

The apparent large difference between the total and average enrollment is due to the fact that in February we added fifteen pupils and an instructor to the Electrical Department.

We began the year with two new instructors, Mr. Frank J. O'Rourke in the Sheet Metal Department and Mr. Orville N. Estes in the Pattern Making. In February, as already noted, Mr. Arthur C. Holton was added as an instructor in the Electrical Department. Mr. Holton spends a large part of his time with the boys who are engaged on the electrical repair work in the various schools of the city.

While Mr. Holton is doing good work and accomplishing much his efficiency could be more than doubled did he not have to depend on the street car service for transportation.

The estimated market value of the work done for the schools of the city was \$6,917.17, and we received cash for outside jobs to the amount of \$1,309.00.

We feel that our combined exhibition and graduation in June gave the people of Quincy a realizing sense of what the school aims to do and the principle for which it stands and has, combined with the labor conditions, resulted in a larger entrance list than can be readily accommodated. The Superintendent and School Committee have done everything in their power consistent with the financial and educational condition of the city to relieve the situation, and we feel sure will continue to do so.

Respectfully submitted,

E. P. BARROWS,
Director.

December 19, 1921.

2. HOME MAKING SCHOOL

MR. FRED H. NICKERSON,
Superintendent of Schools,
Quincy, Massachusetts.

My dear Mr. Nickerson:

It gives me pleasure to send to you the fifth annual report of the Day Home Making School.

The year nineteen twenty-one found us with a membership of thirty-one. Five more joined the school the first of February, making a number that taxed to the limit the capacity of the school. This is to be remedied for the future in that another house has been bought and is now undergoing repairs in order to accommodate a larger number.

Not only have the numbers been larger but the accomplishments greater on account of fewer interruptions from illness and bad weather than in previous years. This is well summed up in the report of Mr. Robert O. Small, Director,

Division of Vocational Education, State Board of Education, in the following:

"The school has progressed and made an excellent record due largely to the efforts of the acting director and the co-operation, enthusiasm and interest of the faculty. The home project work has continued in its usual excellence and the school has continued to gain the respect of the community because of the service which it is rendering."

On June twenty-fourth the school graduated its fifth class with a membership of nine. Of this number five continued their studies in the High School.

On the seventh of September there were fourteen of the older girls to welcome the incoming class of fifteen.

There were two new teachers, Miss Alice Boughtwood and Miss Isabel Jones, to take the places left vacant by Mrs. Louise Beckwith and Miss Harriet McLucas.

Both teachers and pupils are looking forward to the time when we shall be working in our new home where, because of better working conditions, we may hope to record greater achievements.

Respectfully submitted,

ELIZABETH M. DOUGLAS,

Director.

December 19, 1921.

3. CONTINUATION SCHOOL

MR. FRED H. NICKERSON,
Superintendent of Schools,

I submit with pleasure the second annual report of the Quincy Continuation School.

During the school year 1920-1921, we enrolled a total of one hundred and eighty-nine pupils—one hundred and thirty-six boys and fifty-three girls. Eighty-eight of the boys were discharged up to the last of June, 1921, thirty-eight becoming sixteen years of age, forty-three moving to or securing work in other cities, two returning to the regular schools, one leav-

ing on account of illness, and four leaving whom we were unable to follow up. Of the girls, twenty-five were discharged, eight becoming sixteen years old, twelve transferring to other cities, two returning to the regular schools, two leaving because of illness and one leaving for unknown reasons. At the present time we have an active enrollment of forty-nine boys and thirty-four girls.

I am happy to state that the work in the boys' department is much more satisfactory than it was last year. With the construction of the portable building in the High School yard, a room forty feet by twenty feet was placed at our disposal for full-time use. This room at present is being used for both academic and practical arts instruction. Although this is by no means an ideal arrangement, it is so much superior to our facilities of last year that I do not wish to criticise it too severely. The installation of practical arts work has had very good results. This has been apparent since the very beginning of the year, the boys taking much more interest in their work and, what is fully as important, their parents doing likewise. It is worth while to note at this time, I think, the fact that the boys of the Continuation School, under the direction of Mr. Dana B. Clark, instructor in woodworking, built all of the furniture for the above building with the exception of the chairs.

The girls' work is being conducted on much the same lines as last year, except that alternate ten-week courses of sewing and cooking are being given in connection with the academic work, whereas last year cooking alone was given. Miss Julia Leamy and Mrs. Lillian Palmer are the instructors in charge of this work, taking care of all of the girls on one afternoon in the week in the High School. There is no opportunity for conducting a twenty-hour class, a need that is not imperative at present, although it may become so if many girls lose their employment.

The follow-up work, a very important phase of the teacher's duties, is being conducted satisfactorily and the results are very evident in the pupils' school work.

In regard to work in the girls' department, I think the courses need no addition. In the boys' division, there should be some additions made to the equipment of hand tools during the coming year. I should also like to see some opportunity for instruction in elementary commercial work made possible.

I feel that the work of the school is being conducted much more successfully than it was last year, although it cannot be raised to the highest efficiency until we have all the pupils and all the equipment in suitable quarters under one roof, something which will apparently come to pass only with the completion of the new High School.

Respectfully submitted,

HARLAN L. HARRINGTON,

Director.

December, 1921.

4. AMERICANIZATION WORK

MR. FRED H. NICKERSON,

Superintendent of Schools:

It is with pleasure that I submit the report of the Americanization work in Quincy.

Thirty-two classes, with a total enrollment of 833 pupils, closed in May with a real graduation, 255 men and women receiving certificates. Many of these certificates were given to members of the Citizenship Classes.

All the classes visited the Public Library and the pupils at once proceeded to take out books. Refreshments were served by members of the Quincy Women's Club.

Entertainments were given by all the classes, and members of the Americanization Committee of the Quincy Federation of Women's Clubs provided and served refreshments.

The Citizenship Classes held a mock Naturalization Court at the Quincy Court House.

At the beginning of the year thirty-two of our teachers enrolled in the Greater Boston Americanization Course, and

received state certificates. All the teachers are Normal graduates and are doing splendid, conscientious work.

Since October, 657 students, including minors, have been attending classes in the Daniel Webster, Lincoln, Washington, and Willard schools, and, through the courtesy of four organizations who give the use of two rooms two or three times a week, at the Y. M. C. A., Clark Business School, and Finnish Halls.

Over two hundred men are attending classes at the Fore River plant.

A wonderful Christmas party was given at the Fore River Club house on December 21, for the pupils and their families.

Health talks by the School Nurse and sewing will be a feature of the work next year.

The Federation of Women's Clubs, Library, clergy, Chamber of Commerce, North American Civic League, factories, Y. M. C. A. and Auxiliary, foreign language societies, other organizations and individuals are co-operating with the School Department to make this work vital and worth while, and the friendly mingling of the native born with our new friends is the true American spirit. Together, we are carrying out the aim of this department, which is to help all to become good American citizens, honest and law-abiding, living according to the great American ideals in a democracy.

Respectfully submitted,

NELLIE A. PERRY,
Supervisor.

December, 1921.

5. SUMMARIZED REPORT OF THE SCHOOL NURSES

January 1 to December 31, 1921

Cases examined for various causes.....	29,420
Home calls made	1,252
Cases referred to School Physician.....	509
Cases taken to eye and ear clinics.....	131

Cases of corrected vision.....	102
Cases referred to various other clinics.....	1,269
Operations for tonsils and adenoids.....	145
Cases of contagion found and reported.....	121

6. REPORT OF DENTAL CLINICS

Coddington and Daniel Webster Schools

January 1 to December 31, 1921

Number of patients registered	5,468
Number of new patients	970
Number of patients completed	1,012
Total number of visits	5,851

Fillings

Number of amalgam fillings	1,413
Number of cement fillings	2,031
Number of synthetic fillings	424
Number of temporary cement fillings	765
Number of temporary stoppings	162
Number of treatments	1,158

Extractions

Number of permanent teeth extracted	631
Number of temporary teeth extracted.....	2,842

Cleanings

Number of patients' teeth cleaned.....	764
Total number of operations.....	10,190

7. ATTENDANCE OFFICER'S REPORT

MR. F. H. NICKERSON,

Superintendent of Schools:

I herewith submit the twenty-fifth annual report of my work as Attendance Officer for the twelve months ending December 31, 1921.

Number of cases investigated for non-attendance as per blanks	1,697
Number found to be truant	161
Number committed to Training School for truancy	5
Parents and children before court	9
Number convicted	9
Number placed on probation	4
Number of transfer cards investigated	525

Details regarding attendance work and employment certificates for year ending December 31, 1921, appear in the following tables:

ATTENDANCE WORK BY MONTHS

1921	Number of Cases Investigated	Actual Truants	Children of School Age Returned to School from Street	Manufactories and Stores Inspected	Number found Employed Contrary to Law
January	177	13	2	4	..
February	63	5	..	1	..
March	206	11	3	2	1
April	220	18	2	3	2

Decrease from 1920 in total number issued.....	2,842
Total number new certificates issued 1921	933
Total number new certificates issued 1920	3,373
Decrease from 1920 in total number new certificates issued	2,440
Number of newsboys' licenses issued from September 1 to December 31, 1921, to boys 12 to 16 years of age	127

Respectfully submitted,

CHARLES H. JOHNSON,
Attendance Officer.

December, 1921.

APPENDIX B

STATISTICS

TABLE I.

FINANCIAL STATEMENT

For the Fiscal Year Ending December 31, 1921

I. REGULAR SCHOOLS

Appropriated by City Council	\$589,710.69
Expended	575,759.47
Balance unexpended	\$ 13,951.22

ITEMIZED EXPENDITURES

Administration	\$ 22,144.30
Instruction	435,187.66
Text Books	14,290.40
Stationery and Supplies	23,752.57
Operation	58,833.46
Maintenance	10,308.85
Miscellaneous	8,112.54
Evening Academic School	1,703.71
Summer Schools	1,425.98
Total	\$575,759.47

II. STATE AIDED SCHOOLS

DAY INDUSTRIAL SCHOOL

Appropriated by City Council	\$31,500.00
Plus Transfer	18.45
Total	\$31,518.45
Expended	\$31,518.45

HOME MAKING SCHOOL

Appropriated by City Council	\$9,910.00
Expended	9,872.25
	<hr/>
Balance unexpended	\$37.75

CONTINUATION SCHOOL

Appropriated by City Council	\$5,100.00
Plus Transfer	9.85
	<hr/>
Total	\$5,109.85
Expended	5,109.85
	<hr/>

AMERICANIZATION

Appropriated by City Council	\$6,800.00
Expended	6,601.77
	<hr/>
Balance unexpended	\$198.23

EVENING INDUSTRIAL AND PRACTICAL ARTS CLASSES

Appropriated by City Council	\$6,574.02
Expended { Men	\$906.74
Women	5,612.72

APPENDIX C

LIST OF GRADUATES

HIGH SCHOOL

CLASS OF 1921

June 29, 1921

Paul Chester Akin	Donald Cleavenger Davis
Arthur Harris Alden, Jr.	Edwin Colburn Day
Gertrude Evelyn Anderson	Harold William Deacon
Constantino Antonelli	John Gookin Delaney
Wyman O. Arbuckle	John Abel Djerf
Doris Lenora Bain	Helen Mary Donovan
Norma Grace Barnard	Francis Cornelius Driscoll
Clarence Bartley Barron	Dorothy Janet Eaton
John Lyford Beal	Joseph Jordan Eaton
Beryl Ethelwyn Bean	Bessie Hope Ellis
Donald Senior Bennett	Herbert L. Farnham
Edna Benson	Agnes Rita Ferriter
Benjamin Jacob Berman	Gladys Myrtle Fletcher
Sadye Berman	Catherine Ann Foye
Ruth G. Bishop	Karl French
John Everett Bissett	John Fuller, Jr.
Anna Blair	Anna Stephen Gauld
Archibald Thomas Blair	Josephine M. Ghigli
Henry Ainsworth Blake	Emeli Giovannangeli
Helena Anna Bova	George Ambrose Golden
Louise Isabel Breivogel	George Alfred Goodhue
Elizabeth Bradford Breslyn	Ellen Elizabeth Gray
Richard Lowe Brown	Frederick J. Hannon
Ethel Helena Burgess	Reginald Whittle Hanson
Mary Elizabeth Burke	Mary Harris
Margaret Mary Callahan	William A. Hartrey
Edmund Hallett Campbell	Miriam Ann Hixon
Esther Frances Campbell	Henry John Hokenson
Marion Bradford Campbell	William Daniel Houlihan
Florence Caroline Carlson	Sarah Christina Johnson
Ruth Katherine Carlson	Elva Jones
Inez Mildred Carter	Graham Jones
Percy Nathan Castleman	Ruth Genevieve Kaulbeck
Charles James Cavanagh	Wendell Dana Kaulbeck
Helen Frances Cherrington	Wallace Ross Kerr
Dorothy May Clark	Edith Gertrude Kraus
Edmund Wilfred Cooke	Sarah Freda Krous
George Arthur Cooke	Ruth Etta LaCharity
Anna Loretta Coughlin	John Thomas Lane
Cecilia Gertrude Cremins	John Ferguson Laverty
Laura Cumming	Lawrence Gillelan Leavitt
Marjorie May Dame	Helen Louise Levinson
Edwin Francis Davidson	Esther M. Likander

Elma Elizabeth Lind
 Rosalind Beatrice Listman
 Alice Sidgismond McCarron
 Juliette M. McCarthy
 Floyd Perkins Macdonald
 Mary Gertrude McGinty
 Eleanor Christine McKinnon
 Florence Catherine MacLeod
 Edwin Carl Maibach
 Beatrice Eleanor Martin
 Russell Harmon Martin
 Josephine Yvonne Martineau
 Hazel Stewart Mason
 Chester Hausman Mellish
 Arthur S. Mendel
 Louis Faxon Merrill
 Blanche Claudia Messier
 John Lewis Miller
 Ruth Harrison Morley
 Dorothea Murphy
 Corrine Maria Nelson
 Ralph Jonas Newcomb
 Archer Mills Nickerson, Jr.
 Esther Charlotte L. Nilsen
 Margaret Spaulding Nowell
 Roy Conrad Olson
 Florence Edith Orcutt
 Mary Marjorie Owens
 Reginald William Palmer
 Nellie Lois Parlee
 Elsie May Parmenter
 Freda Stella Paul
 Lillian Ingaborg Peterson
 Corine Annie Pineau
 Ernest Whitman Piper
 Lillian Loretta Pitts
 Beatrice Palmer Porter
 Evelyn Allen Price

Dorothy E. Prout
 Anne Putnam
 Bertha Othelia Pyyny
 John Matthew Quin
 Gilbert Franklin Redlon, Jr.
 Dorris Evelyn Rendle
 Florence May Rizzi
 Josephine Paula Roberts
 Francis Walton Roets
 Bradford Ropes
 Richard Merrill Saunders
 Catherine Teresa Saville
 Helen Ingeborg Sellberg
 Irving Lawrence Shaw, Jr.
 Elizabeth Beatrice Smith
 Virginia Helen Smith
 Margaret Watson Souden
 Edward M. Speirs
 Dorothy Whittaker Spence
 Marion Gertrude Starratt
 Arthur Hill Steele
 Sara Irene Stephens
 Annie Elizabeth Stevens
 Errica Helen Stopin
 Jennie Mildred Swanson
 Anna Tantillo
 Mary Olive Townsend
 Barbara Wells
 Greta Emma Wester
 Lois Hall Wetmore
 Alice Millini White
 Helen English White
 Arthur Frederick Whitehead
 Grace Adeline Whitney
 Bertha Elizabeth Wight
 Anna Marie Wright
 Ruth Emildea C. Williams
 Ruth Esdale Wilmore

Edgar Douglas Yule

ELEMENTARY SCHOOLS

January, 1921

ADAMS SCHOOL—18

Elsa A. Almquist
Frederick W. Berry
Russell W. Craig
Robert H. Fay
Philip J. Gacicia
Gunnar J. Gelotte
Natalie M. Ghigli
Alice E. Gullans
Norman E. MacLeod

Albert N. MacWilliam
Margaret L. Marr
John B. McCulloch
Annie M. Ohman
Mabel E. Overlock
Frederick A. Sproul
Edward G. Sutton
Miriam Westland
Albert W. Whitman

ATHERTON HOUGH SCHOOL—14

Ralph Louis Armstrong
Francis Blake Finn
Grace Loring Harvey
Charles Joseph Mackie
Walter Truve McKinnon
Joseph Francis Murphy
William Augustine McGillivray

John Bartholomew McCormack
Gladys Elfreda Nelson
Roland Kenneth Josslyn
Rose Esther Page
Anna Quirk
Anna Alice Schwartzwalder
William Scott Thompson

CODDINGTON SCHOOL—16

Eleanor Beatrice Bleakley
Henrietta Julia Burroughs
Henry Nicholas Carlson
Charles Alfred Decker
Ida DiCesare
Edward Harold Flynn
Gerald Winthrop Hinckley
John Williamson Laing

Kenneth Gerald Leavitt
Paul Walker Littlefield
Munroe Deacon MacLean
John Morton
Rachel Matilda Thomas
Jessie Rose Turtle
Helen Frances Sawtelle
Elizabeth Veronica Sullivan

CRANCH SCHOOL—12

Ruth Evelyn Arbuckle
Agnes Louise Fornell
Constance Rhodes Handy
Corinne Evelyn Holteen
Phyllis Victoria Johnson
Joseph Copeland Morse, Jr.

Carl Christian Nelson
Elsie Viola Nelson
Francis Richard O'Brien
Astrid Catherine Resell
William Kimball Savary
Annie Susan Swithin

DANIEL WEBSTER SCHOOL—22

Lena J. Asnes	Christopher W. Lewis
Abraham Baram	Margaret H. MacDonald
Mary Best	Margaret May
Josephine A. Brandolini	Salvatore Miraglio
Annie DiNicholantonio	Margaret R. Muir
Earl F. Dunham	William E. Nichols
Samuel Glassman	Pearl G. Randell
Albert P. Hillstrom	Francis J. Reardon
Isabella M. Hutchinson	Thomas V. Rush
Bessie A. Krasnigo	Annie Solow
Pearl Kuperman	Ernest S. Wilding

FRANCIS W. PARKER SCHOOL—31

Evelyn A. Ambrose	Edward L. Maloney
John W. Barlow	Julia E. Manneras
Velma M. Battey	Elizabeth C. Morris
Olga C. Bredezen	George H. Noble
Eleanor J. Campbell	Lawrence J. O'Loane
Margaret M. Chrisom	John M. Palmer
Joseph L. Curran	Irene G. Pemberton
Mildred J. Donahue	Elmer E. Platner
Edna Elder	Carol H. Queen
Victor A. Ericson	Elsa E. Sandstrom
William Gavin	Mildred L. Skoglund
Edward A. Green	Evelyn M. Terry
John H. Kennedy	Everett S. Thomas
Eva V. Kilpatrick	Eugene M. Tibbetts
Barbara Klingehagen	Emily E. Whyte
	Margaret G. Whyte

GOVERNMENT SCHOOL—S

Marion Costello	Robert Stewart
Francis Hackett	Richard Stunkel
Elmer Peterson	Lena Zelikoff
Lazarus Phillips	Louis Zelikoff

GRIDLEY BRYANT—6

Angelo Louis Bianchi	Margaret Mary O'Connell
Harry Francis Falvey	Pasqualino Razza
William Ferrazzi	Mary Regina White

JOHN HANCOCK—11

Jacob Applebaum	Paul Albert Johnson
Morris Asnes	Marguerite Christine Lahey
Mabel Beatrice DeBoer	Florence Catherine McLean
Olive May Dunbar	Dorothy May McPherson
Frederick Julius Gorman	George Robert Tinney
	Edythe Miriam Webster

LINCOLN SCHOOL—12

Myrtle Catherine Campbell	Frank Waltermar Pyyny
Samuel Thomas Collins	Helen Marie Riihimaki
Cosimo William D'Andrea	George Lester Ross
Alice Margaret DePaulo	Alexander George Souden
Allan Duncan Johnson	William Edward Tite
Douglas Gordon Arthur McDonald	Rose Hazel Vergobbi

MONTCLAIR SCHOOL—13

Susan H. Carney	Christina A. Ross
Mabel A. Guilhop	Clara L. Saylor
Theresa F. Lester	Ruth E. Smith
Carl G. Lund	Dorothy M. Stetson
Beatrice L. Martineau	Fred J. Stevenson
Edward J. Morgan	Margaret V. Tolman
	Joseph B. Varley

QUINCY SCHOOL—14

Charles A. Ashland	Elizabeth M. Kerrigan
Richard J. Barry	Eleanor C. Landeck
William P. Clark	Amy I. Morgan
Herbert Dixon	Lucille C. Nye
Irene Edwards	Harold C. Olson
Harry W. Folkins	Clarence R. Smith
Mary I. Field	Sabastino Volpe

SQUANTUM SCHOOL—7

Eric Carl Dahlquist	Marjorie Helen Mardon
Melba Alice Annette Hanson	James Philip McCarron
Ruth M. Holmes	Albert Richardson
	Emery H. S. Swanson

WASHINGTON SCHOOL—19

Walter Dunlea	Harold Russell
Esther Halonen	Gertrude Savage
Elinor Hammett	David Sharp
Everett Hayden	Wade Shorter
Elwin Hennessey	Rose St. John
Edward Hoyle	Stanley St. John
Arthur Hubbard	Mary Stitt
Gertrude McDonald	Louis White
James Newson	George Wigglund
	Charles Wise

WILLARD—33

Melba Madeline Aguzzoli	Ruth Eleanor Johnson
Laura Marie Alto	Ero Theodore Samuel Johnson
Alice Violet Cantilli	Aili Marie Juhlka
Angelina Casagrande	Joseph Norman Lee
Americo Samuel Cassani	Gladys Emily McMillan
Russell Everett Clark	Lillian Mae Martell
Raphael Mariano Coletti	Anne Anna Nelson
Edward Foss Curry	Stephen Niland
Lawrence James Doyle	Julia Mary Pangraze

Helen Elizabeth Wilhelmina
Enquist
Anna Mary Fitzgerald
Edmond Adelbert Gosselin
Oswald Graham
Eugene Jellow
Arthur Theodore Johnson
Henrietta Louise Johnson

Ilmi Puskala
Irene Elizabeth Shea
Edward James Soraghan
Theodore Francis Trask
Bernard Turnquist
Walter William Werner
John Edward Wuerth
Lucy Zanotti

WOLLASTON SCHOOL—21

John Edward McPhee, Jr.
Donald Truxton Neal
John Phillips
Agnes Loretta Rice
Madlyn Edna Richardson
Charlotte Martha Riggs
Carrol Woodbury Saunders
Philip Jacob Schwind
Dorothy Frances Smith
Carl Gustave Wennberg

Dorothy Briggs
Joseph Weston Bryan
Myrtle Marie Edna Bryan
Virginia Frances Call
Florence Catherine Cooke
Henry Cutler
Norman Selden George
Ruth Agnes Hansen
Elma Aleda Edith Jackson
Ruth Kingsbury

Frances Whitcomb

ELEMENTARY SCHOOLS

June, 1921

ADAMS SCHOOL—31

Annie Evelyn Ackerson	Lena Montosi
M. Angelina Crosta	Vera E. Persion
Ethel B. Diack	Marguerite Alice Pinel
Florence B. Ericson	Philip John Pinel
Evangeline M. Ferguson	Walter William Pinel
Frank Gacicia	Herbert Prout
Marie C. Giordani	Minnotto Carl Pucciarelli
Harris John Golbranson	Elsie May Rhines
Edythe Ruth Grossman	Emma May Robertson
Phyllis Mary Jenkins	Catherine Ross
Thomas Kennedy	Herbert G. Ross
Ardyss Y. Macteer	Alfred J. Sanderson
Isabella C. MacLennan	E. Celon Sherman
Donald J. MacLeod	Ada Mary Tesolini
Marjorie Bradford Milne	E. Bernice Van Stry
Robert William Vergobbi	

ATHERTON HOUGH SCHOOL—21

Rosemary Boyle	Walter Stephen Marsters
Gertrude Theresa Cleary	Florence Marguerite McGarry
Theodore Lane Comboss, Jr.	Anthony Eldredge Medros
Emily Gertrude Dalley	Ruth Johnson Mighill
Arthur Paul Dowling	Catherine Eunice Muldoon
